Regular Meeting of Village Council

Minutes of the meeting of the
Village Council held on Monday
night, April 8th.

Present: Councillors, Laut,
Asmussen and Mayor Williams.
Moved by Mr. Laut that min-
utes of previous meeting as read
be approved.

A representative of the Fyre
Fyter Co. of Dayton, Ohio, ap-
peared before the Council and
spoke at length of the equipment
they handle.

Mayor Williams stated that the
Council were not in the market
for any additional fire fighting
equipment at the present time.

A petition from the business
men of the village, asking the
Council to make the Wednesday
half-holiday of each week, during
the months of May, June, July
and August, a permanent one.

Moved by Mr. Laut, seconded
by Mr. Asmussen that, the by-law
of last year re closing the places
of business be made a permanent
one.

Gordon Purvis gave his report
of looking after the skating rink.
Mr. Purvis gave a detailed state-
ment, showing all money received
during the winter. Mr. Purvis
was guaranteed \$100 for the ses-
son's work and what ever he could
make over that amount was his.
He took in \$114.00.

Charlie Purvis, secretary of the
Curling Club, presented his re-
port showing the money paid out
by the Club for light and coal
the village paid half of this
amount, which was deducted from
\$100 rent charge, leaving the vil-
lage about \$50.00 clear.

Mayor Williams complimented
the Purvis Bros. for the way in
which they submitted these re-
ports.

Mayor Williams thought it ad-
visable to have the by-law gover-
ning dray licenses, amended to in-
clude trucks.

Moved by Mr. Laut, seconded
by Mr. Asmussen that, a new by-
law be drafted, which shall in-
clude trucks, etc. The license
fee to remain at \$10.00 a year.

It was decided to extend the
drain from Smith Street to the
slough, a distance of 150 yards.
This it is expected will run off the
water that floods Nanton Street
each spring.

Tenders are to be called for this
work.

Mr. Laut brought up the mat-
ter of the park, and explained to
the council, the Board of Trades
desire to secure permission from
the Council to clean up the shrub-
bery and to put in certain play
ground equipment for the child-
ren.

Mr. Laut and Mr. Asmussen
were appointed as a committee
to meet the committee of the
Board of Trade and deal with this
question.

Dan Fike addressed the Coun-
cil, wanting permission to remove
the hedge from the north side of
the cemetery to the south side.
Mr. Fike explained the supposed
advantages of such a move.

Mr. Laut did not think that
any work should be done with-
out consulting the Women's In-
stitute who have spent a lot of
time and money in fixing up the
cemetery.

Mr. Laut and Mr. Asmussen
were appointed on the cemetery
committee.

Several accounts were passed
and ordered paid.

Meeting adjourned.

At the United Church next
Sunday evening, the subject will
be "The Cross." The choir will
sing the Anthem: "There is a
Fountain."

Mr. and Mrs. J. Robinson have
moved into the Porteous house in
the north part of town.

BREEDING STOCK BOUGHT BY EAST

50 Head and Herd Bull From Collicutt
Ranch Going to Renfrew

One of the most important sales
of Alberta breeding stock in re-
cent years was made on Thursday
last in the disposal of fifty pure
bred Hereford heifers, and a good
herd bull from the Willow Springs
Ranch of Frank Collicutt & Son,
Crossfield, to the M. J. O'Brien
Co., Ltd. of Renfrew, Ontario.

The purchase for the O'Brien
interests, which operate large far-
ming establishments in the east
and also at Lloydminster, Alberta
was made by James B. Easton,
farm superintendent for the com-
pany. The bull included in the
herd is Willow Springs Gay Lad
686th, which was grand champion
at the Toronto Royal in 1928, and
the females include some of the
best young stock on the Collicutt
ranch.

The O'Brien herd of purebred
Herefords was started with the
purchase of the Collicutt show
herd at the Canadian National
Exhibition, Toronto in 1921. With
the object of increasing the herd
on the company's 8,000-acre farm
in Ontario. Mr. Easton has re-
cently been looking over the prin-
cipal Hereford breeding establish-
ments in Western Canada, with
the result that the choice of the
fifty-one Collicutt animals
was made last week. The cattle
will be shipped shortly to their
new range in Ontario. While the
price paid for the animals was not
disclosed, Mr. Collicutt stated
that it was satisfactory.

BRANCH LINE GOES SOUTH OF TOWN

The plan of the C. P. R. branch
line to be built out of Crossfield
this year, shows that it starts on
the other side of the slough, just
south of town; going through G.
Murdoch's farm where the Y will
be constructed; then west passing
through the farms of Amery &
Son, Mrs. Cowling, J. S. Davie,
W. H. Long, F. Landymore, W.
Stauffer, A. Melling; then through
Stauffer's place again, crossing
the road near Stauffer's gate,
bearing south through G. Landymore's,
F. Collicutt's and Geo. Murdoch's (Shorty Nier) place,
then bearing north through the
McPherson Coulee.

This shows how road will be
built through the land in the M.
D. of Rosebud, and is the only
map available here at the present
time.

What a Difference a Little Paint Makes

F. Baker is having the finishing
touches put to his garage this
week. The stucco finish is being
put on and the building painted.
Dad Halliday has had the front
of his store decked out in new
paint. The Home Cafe has also
been brightened up with a coat
of paint. H. H. Gordon is busy
painting his implement warehouse
and will soon have that building
looking like a place of business.

There is a whole lot of cleaning
up to be done, especially in the
back alleys, but, it is expected
that the Village Council will pro-
claim a clean-up day and see to it
that the work is done.

George Collicutt was elected to
the board of directors of the Al-
berta Hereford Breeders' Associa-
tion at a meeting held in Calgary
last week.

The Lord Bishop of Calgary
Dr. Sherman is coming today to
hold confirmation services at Bal-
zac and Crossfield.

Mrs. Jim Brown of Turner Val-
ley, was renewing old acquaint-
ances in town during the week.

Below we give you a few of our

The Stumbling Block

Whatever may be the outcome of the naval conference in session in London, and at the time of writing it is still problematical and obscure, the fact that leading statesmen of the world, engrossed, as they are, with many domestic and other problems, and carrying heavy responsibilities, have for months doggedly persevered in their efforts to find common ground upon which a reduction of armaments can be brought about, is, in itself, one of the most hopeful signs for world peace.

Not many years ago such a conference would have, long ere this, broken up in an open confession of failure, with national feelings more embittered than ever, and a still more feverish renewal of warlike preparations on the part of all nations. Even if the present conference does not succeed in reaching a formal and unanimous agreement, the persistency, the intensity with which those participating have sought for a solution is encouraging and full of hope for ultimate success.

The proceedings of the conference as they have dragged along week after week, have proven the sincerity of the statements made by the various representatives at the opening session, namely, that they and the governments they represent are keenly desirous of reaching an agreement, that they are anxious to make future wars impossible, that they believe in the letter and spirit of the Kellogg peace pact, and to that end are willing to make what they consider sacrifices to achieve reduction in armaments and a consequent lessening of the possibilities of war and of the burden of taxation imposed upon their people.

This sincerity of purpose has been demonstrated over and over again. When any particular formula or plan was found to be unacceptable in any particular to any one nation, the others sought for amendments that would meet the objections raised. When the objections raised were found to be unworkable, that formula or plan was discarded, and something different brought forward. Step by step, in sub-conferences innumerable, by direct negotiations between those countries which were farthest apart in their views, difficulties were gradually overcome.

Just how much has been accomplished, the world does not yet know; perhaps little of a really definite nature. But the whole effect has been beneficial. It is beyond all question that the nations now understand and appreciate each other's viewpoints and difficulties better than ever before, because it is quite evident that the negotiations have been conducted with great frankness, and yet with an absence of that bitterness and ill-feeling which existed in past years. Whatever the present outcome, the way, we repeat, has been paved to ultimate success.

And what is the obstacle to immediate success, assuming that it cannot at this time be achieved? It is that the centuries-old racial dislikes, suspicions, superiority complexes, and religious differences still project themselves and live in this twentieth century of the Christian era. Each and every nation indignantly denies and rejects the idea that they entertain, desire or propose any policy or act of aggression against any other nation. But each and every nation is, nevertheless, demanding security against other nations.

In a word, while professing their own honesty of purpose, they remain doubtful and suspicious of their neighbors.

Here in Canada we may find it somewhat difficult to understand this attitude, and be inclined to question the sincerity of those who adopt it. But if we pause for a moment and ponder over the problem a bit, we will, perhaps, come to appreciate the European viewpoint somewhat better. And in doing so we, too, may learn a lesson of importance to ourselves, our communities, and our Dominion.

After all, what is the chief cause of friction, ill-will, bitterness and suspicion right here in Canada, and in our own community? Does it not arise out of differences in racial origin, different languages employed, differing forms by and through which we worship the same God? Are we not suspicious and distrustful of our neighbors simply because their racial origin differs from our own, because their mother tongue is not ours, because their religious thought and church observances differ from ours? We feel that they should conform to our ideas and ways of thought, and because we feel this, we imagine that they, in turn, are trying to impose their ways upon us.

It is the same European nightmare in a somewhat milder form. We want and demand security. Instead of armies and navies, we place reliance in laws, regulations, prohibitions. France would bring all Europe to her way of thinking, Germany to her way. We, in Canada, seem to demand complete assimilation, absolute uniformity. It is the same principle. And it is a principle if persisted in, and carried to its logical conclusion, results in ill-feeling, bitterness and strife, and makes peace impossible of attainment.

A broader education, a truer appreciation of the fact that all men are brothers, that a man's a man for a' that, a nearer approach to the spirit of the Christ, is an essential of world disarmament and peace, just as it is an essential to community betterment and national peace and progress. Demands for security will only be unnecessary and die when we no longer entertain suspicions and fears of those against whom we would arm in one form or another.

Sixty-Five Years Of Service

Eighty-One-Year Old Woman Is Still On Job

A white haired woman sat at her bench in the J. & E. Stevens plant in Cromwell, Connecticut, — sat and

FREE BABY BOOKS
Write The Borden Co., Limited, Dept. 34, 141, Lake Street, Chicago, Ill., for two baby Welfare Books.

W. N. U. 1632

thought back over a stretch of sixty-five years of service under one firm. Meanwhile she was busy at her job — that of packing little iron toys for packing them for shipment. The woman who is believed to have the longest record of employment with one concern in Connecticut, is Miss Kate Ralph. She began work with the Stevens concern when sixteen.

Miss Ralph has walked the three miles from her home to her daily task every day of her working life. This is the picture of health.

The ease with which corns and warts can be removed by Hovars' Corn Remover is its strongest recommendation. It seldom fails.

War Restrictions Raised
One of the last remaining relics of the Great War has been abolished by the League of Nations. This is the series of import and export restrictions which were enacted by the various nations during the war to prevent exportation of raw materials and manufactured articles necessary for them to carry on the conflict. As the years rolled by and the regulations were not repealed world trade was seriously hampered.

Noted Flier Performs Thrilling Exploit

Australian Ace Forces Machine To Rise In Forest Clearing
Captain Charles Kingsford D. Smith, the Australian ace who flew from the United States to Australia in 1928, has just performed the most thrilling exploits of his career.

He is now the director of an air line. Recently when one of the company's triple-engine machines made a forced landing in a forest clearing near Bonabo, Northern New South Wales, it seemed that the plane could be moved only by being dismantled.

Smith went to the scene, repaired the damaged under-carriage, tied the plane's tail to a tree and set his engines going full speed. When the machine lifted from the ground a farmer cut the rope and the plane flashed away like a rocket.

Even then the straining plane, bucking like a broncho, could barely rise above the towering forest trees. It was a long time before the machine lifted from the ground a farmer cut the rope and the plane flashed away like a rocket.

topmost bough tore the fabric from underneath the fuselage and the machine trembled like a wounded bird, but it kept up and Smith got it safely to the airfield.

Smith went to the scene, repaired the damaged under-carriage, tied the plane's tail to a tree and set his engines going full speed. When the machine lifted from the ground a farmer cut the rope and the plane flashed away like a rocket.

Even then the straining plane, bucking like a broncho, could barely rise above the towering forest trees. It was a long time before the machine lifted from the ground a farmer cut the rope and the plane flashed away like a rocket.

Dr. Williams' Pink Pills for Pale People are an excellent blood purifier and nerve tonic, but are especially useful in the spring. Every dose helps to make new, rich, red blood and with this new blood returning strength, cheerfulness and good health quickly follow.

If you are pale, easily tired, or breathless at the least exertion, if your complexion is poor or you are troubled with pimples or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you have tingling or rheumatic, subject to headaches and backaches, if you are irritable and nervous, if your sleep does not refresh you, or your appetite is poor, you need the treatment Dr. Williams' Pink Pills alone can give—you need the new blood, new strength and new energy this medicine always brings. Mr. A. Marcotte, North Ham, Que., writes: "I have found great benefit from the use of Dr. Williams' Pink Pills. Before I began using them I was in a badly run-down condition, and at times felt scarcely able to work. Dr. Williams' Pink Pills have changed all this and since taking them I am enjoying the best of health. Every man who feels run-down and easily tired should give this great medicine a fair trial."

Dr. Williams' Pink Pills for Pale People are an excellent blood purifier and nerve tonic, but are especially useful in the spring. Every dose helps to make new, rich, red blood and with this new blood returning strength, cheerfulness and good health quickly follow.

Increases In Serious Crimes Shown In Provincial Police Report
Increases in several of the more serious crime categories were noted in the annual report of the Ontario provincial police which was tabled in the legislature. Prosecutions during 1929 totalled 33,159, an increase of 1,883 over the figures for the preceding year.

Increases were noted in the number of murders, manslaughter charges, offences against women, suicides, automobile fatalities and drownings. Last year there were 20 murders in the province, compared to 14 in 1928; 28 manslaughter charges, against 18; 83 suicides against 58, automobile fatalities totalled 248, while there were only 162 in 1928, and drownings increased from 144 to 191. Deaths from other causes numbered 188, compared to 243 in 1928.

A monthly newspaper published by students of Alaska College in Fairbanks, has attained a circulation of 4,000.

Really large precious stones, especially emeralds, rubies, and sapphires are in great demand; they may run up to \$50,000 in value.

CATARRH In the Nostrils Stops in 10 Minutes

You can stop that nasty nasal discharge in an hour by breathing "Catarrhazone." Sneezing, running eyes and itchy nose are promptly cured. No medicine to take—you simply inhale the soothing fumes of Catarrhazone and get well. That grippy, neuralgic headache passes away. Nose and throat are cleared of offensive discharges. Catarrh, nose colds, coughing and spitting come to an end when you use Catarrhazone. It is safe, reliable, sure to eradicate your cold. Catarrhazone is free from any drug. Two months' treatment, \$1.00, small size, 50c.

Catarrhazone
A Ten-Minute Relief!

Drummond Was a Telegrapher

Recalls When Well Beloved Habitant Felt Field Down Night Trek

Dr. Drummond going out into the parishes of ancient Quebec, attending the sick, listening to old stories and ways, with his eyes and ears always open and his sympathy tuned to catch the simple life of the habitant in its many phases, is a familiar figure in Canadian literature. Not so well known is the Drummond of the seventies, before he wrote "The Wreck of the Jules Plante" and the other stories that have become so well-beloved. In the seventies, Drummond was an undergraduate at McGill College, studying medicine and attending lectures all day and at night operating a telegraph key.

"Bill held down the same trick on the Associated Press wire as I did later on," says Thomas Rodger, special representative of the Canadian National Railway's telegraph and telephone department, who has just retired after 56 years' service with the system. "Bill was on the night trick necessarily, as he was attending McGill College during the day." Rodger recalls Drummond's fondness for the press wire on receiving his degree and going into practice and remembers the favor with which the public received the first book of poems, "The Habitant," says Rodger. "Bill Drummond will be vivid to the end," says the veteran, "especially as I have so often seen him haranguing with the French-Canadian line men in the broken French-English patois he used in his writing."

The Wealth Of India

Apart from the Indian States there are probably many more millionaires in British India than in America, and they are all, or nearly all, Indian. But these fortunes enormous as they are in the aggregate, are unquestionably a mere fraction of the still more marvellous wealth which exists in the shape of gold and silver hoards throughout the vast domain of India, whether British India, or the Indian States.

A Foe To Asthma. Give Asthma a chance and it gains ground rapidly. But give it repeated treatments of Dr. D. K. Kellogg's Asthma Remedy and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It reaches the inmost breathing passages and leaves no place for the trouble to lurk. Have it by you for ready use.

Defy Curse Of Pharaohs

The king and queen of the Belgians have defied the reputed curse of the Pharaohs. With Howard Carter, excavator of the tomb of Tut-Ankh-Amen, King Albert and Queen Elizabeth visited the tomb in the Valley of the Kings, and neither indicated any bad luck was expected. Thereafter the king walked nearly two miles from his yacht into Karnak.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is especially effective in easing inflammation and healing cuts, scratches, bruises and sprains. The remedy is so handy in the family medicine chest saves many a fee.

The Deadly Fair
Open your eyes and close boards with nails in them are a menace to many children on our farms and in our towns. Both are so easily prevented by a little care and foresight.

Fully 100,000 persons in Italy receive their livelihood from the manufacture and sale of automobiles. Minard's Will Stop That Toothache.

Standing Up Under Loss

Takes More Than Market Crash To Down Canadians
During the recent market crash, paper losses sustained by Canadian listed and unlisted stocks amounted to more than \$5,000,000,000. This is more than double the gross funded debt of the Dominion, or \$55 per capita.

And yet, with a loss of more than five billion dollars, the people of Canada can go about their business with little more than the embarrassment of feeling sheepish over being bad. The truth is that no stock crash can knock the props out from beneath a country that has trillions of dollars in natural resources, both mapped and uncharted.

The mines alone of this Dominion are worth more than the total resources of Germany, France and Italy. Our forests and fisheries have more latent wealth than the combined wealth of all the Balkan states.

Our annual exportable wheat crop is worth more than the goods that Spain has produced for export in the past fifty years.

That is why Canadians can take a little financial blow of \$5,000,000,000 without feeling as if they were in some country!

Natives Of Canada Go Abroad

Wainwright Buffalo Find a New Home In Adelaide, Australia

Jupiter and Toots and Casper, the three Wainwright bison presented to Adelaide, Australia, by the Canadian Government, reached their new and far distant home in the pink of condition, and are now well settled between the yaks and the African buffalo, according to word received from Australia. On the gate of their enclosure has been fastened a brass tablet bearing the word "Buffalo" from Wainwright Park, Alberta, Canada, Canadian National Railway, donated by the Dominion of Canada."

Pendax Balm quickly relieves chapping, windburn and all roughness caused by weather conditions. Keeps the complexion clear and lovely. Completely absorbed by gentle rubbing. Never leaves undesirable stickiness. Stimulates the skin. Makes it soft, smooth and flawless. Preserves and enhances natural beauty. Soothes, refreshes and invigorates. Makes hands soft and flawlessly white. Imparts that subtle charm so essential to true elegance.

Central Steam Heating System

For the first time since its establishment in 1924, the City of Wainwright's central steam heating system shows a surplus, \$31,000 having been realized last year. From now on the system is expected to be on a paying basis.

Interest In Bay Route

Wide interest is being shown in the proposed opening of the Hudson Bay route this year, many communications being received by the Department of Railways, Labor and Industries. It is anticipated that a large number will attend the opening ceremonies.

An ounce of good humor is worth a pound of regrets.

Linking Canada and Britain

British Post Office To Provide Direct Wireless Phone Service

Canada and Britain are to be linked by direct wireless telephone. The House of Commons recently debated the respective merits of the Marconi and the British post office wireless systems. Hon. H. B. Lee-Smith, postmaster-general, revealed that the Canadian government had expressed a desire for direct service.

The direct service will be provided by the post office. Arranging the general merits of the post office system, as contrasted with Marconi, the postmaster-general said the lower costs of its aerials enabled it to give three wave lengths to each Dominion. The Marconi system provided two to most of the Dominions and only one for Australia.

For years Mother Graves' Worm Expeller has ranked as a reliable worm preparation and it always maintains its reputation.

Mail carried over the 8,000 miles air line from New York to Montevideo, reaches its destination a whole week quicker than mail carried by ships.

The Problems Which Confront Agriculture In The West Now Are Vitally Aggressive

Prof. W. M. Swanson, M.A., Ph.D., professor of economics at the University of Saskatchewan, addressed members of the Canadian Club at a luncheon in Regina recently. Dr. Swanson took as his subject, "Wheat and Changing Agriculture."

"I think we should think less of our cherished principles as to how we can organize the life of the world on a co-operative basis and come back to hard realities," Dr. Swanson declared. He suggested the establishment of a wheat council or body composed of men representing the private individual as well as members of the Wheat Pool to determine a selling policy which would give the farmers the greatest net returns for what they produced from the soil.

"It is the duty of all of us to attempt to strengthen and maintain the morale of the Wheat Pool, to get the farmers behind this selling agency, because if it should collapse at this time, it would be fatal to the economic life of the west," he continued.

Describing wheat as the life-blood of commerce, the plasma of society, Dr. Swanson deplored the tactics of pessimists who were destroying the morale of the country rather than attempting to build up the strength of the faith of the community in wheat possibilities.

"I believe it is a good deal more important to explore all avenues of co-operation in our own country before we turn to the foreigner," Dr. Swanson remarked in stressing the importance of securing the best business houses and abilities to be placed at the disposal of the farming community.

The problems confronting agriculture in the west today were vitally aggressive, according to Dr. Swanson. A profound change had come over the feature of economic life, due to the introduction of power on the farms, the mechanization of the farms and the spread of the "city point of view" and the urbanization of the country.

"The agriculturalist faces a battle today in which every ounce of courage, energy and morale is required to achieve success," Dr. Swanson pointed out.

The fundamental effect on marketing in Canada of what occurs in the wheat markets of the United States was outlined by Dr. Swanson, who saw in the artificially built up co-operatives of that country the creation of a wheat surplus in that republic which, in turn, would affect the Canadian markets.

"Never under any circumstances can we avoid the factors of demand and supply. Problems we face in Canada are only part of a world-wide problem," Dr. Swanson asserted. "We must analyze the factors of demand and supply so that we can build up a marketing structure of stone and iron rather than straw."

Pleading that a bond of sympathy be established and strengthened between the men of the soil and the city-bred, Dr. Swanson also urged the maintenance of a rural point of view. "Our wishes, our hearts and our hopes are bound up in the rural point of view. If we lose this vision, we lose all that the pioneers of this west have built up."

Dr. Swanson saw, not the tragedy of wasted natural resources, but the waste of human life on the farms in the boys and the girls who were not to get an education this year, an opportunity to broaden their selves spiritually, traceable to the economic conditions of the country today as affecting agriculture.

The loyal marketing of wheat based on the real price of the world and the staunch support of the men who believe in the west, would build up the type of democracy required, in the opinion of Dr. Swanson.

Had Satisfactory Year

Western Canada Increased Dairy Production In 1929

Western Canada experienced a very satisfactory year with respect to dairying during 1929 according to annual returns now being made. Manitoba had an increase in production of creamy butter of more than 1,600,000 lbs. Saskatchewan records an increase in the milk line of 30 per cent, while Alberta had an increase also of more than 1,600,000 lbs. Total value of all dairy products in the three western provinces for the year was \$37,629,000. Alberta experienced the best year since 1924 in this respect with a total dairy products value of over \$20,000,000. Saskatchewan's was \$21,982,000 and Manitoba's was \$14,997,000. In eleven of the large exhibitions held throughout Canada during the past year, the prairie west captured 90 per cent. of all first prizes in butter, and 86 per cent. of all prizes, over half of which came to Manitoba.

(By Anabelle Worthington)

3570

A sheath-like crepe silk in blue violet shade that is luxuriously smart. Silenced applied panels at either side of the bodice add to its feminine theme. They make the normal waistline conspicuous and secure a snugness that makes the figure appear slim. The finished sleeves are a touch.

The flaring skirt smartly dips at the back.

Style No. 3570 can be had in sizes 10, 12, 14, 16, 18, 20, 22, 24 and 26 inches bust.

Black silk crepe, orange-red crepe, putty-beige silk crepe, lappule blue nantons crepe and crepe lilac-bell in Latvian green are smart combinations.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Canada Won Second Place

King's Trophy For Rifle Shooting Efficiency Goes To South Africa

South Africa won the King's trophy of 1929 for rifle shooting efficiency. More than 40,000 boys in all parts of the Empire competed.

Canada ranked second, closely behind South Africa, while Great Britain came third and New Zealand fourth. Australia did not qualify.

The results were announced by the National Rifle Association recently after careful compilation of the thousands of scores. It is the fourth South African victory out of five years.

The minimum number of boys competing in each Dominion is 3,000. South Africa scored 83.2 per head out of a possible 100. Canada stood second with 80.2 and Britain in third place was far behind with 69.5.

The New Zealand average was 66.5. Australia showed only 1,365 boys competing.

The number of competitions was 40,150.

The National Rifle Association announced "Canada's excellent average showed an increase on her previous score of 2.6 per firer. The Dominion possesses a much larger number of really expert shots than any other country, and indeed, as many marksmen and first class shots as the winners, but the standard of mass proficiency is for similar numbers, below South Africa, although it shows marked improvement annually."

Canada has 72 silver and 172 bronze medals of honor, awarded to individuals making scores of 100 or 99 (silver), and 98 to 97 (bronze) respectively—a number in each case far in excess of the aggregate won by other Empire competitors and amateur competitors.

Famine Conditions In China

Three Hundred Thousand Of Beans In Transit Which Will Save Lives Of Two Million People

Three hundred tons of beans, now being delivered for shipment from Shansu Province to the neighboring province of Shensi, in the famine-stricken area of North Central China, will save the lives of two million people, officers of the China famine relief have stated.

Over an area of about 450,000 square miles, embracing five provinces and a population of about 50 million, relief workers are struggling against what is described as the worst famine China has known in 70 years. Eight million dead is the toll which hunger has taken in the past two years during which famine has been continuous and growing.

Crop failure occasioned by drought and aided by revolution and banditry which drew men away from the business of insuring a proper food supply, brought millions face to face with slow but certain annihilation. Figures in the story of the disaster are computed from the estimates of missionaries, press correspondents and agents of the relief committee, who have travelled extensively through the stricken area.

In a country where facilities for communication were so slow that 250,000 persons were killed in ten minutes by an earthquake without the rest of the world being aware of the fact, relief work is rendered most difficult. Dr. S. Parkes Cadman, chairman of the national committee, explained to the Canadian Press.

Astronomy Master: "Williams can you give me the name of any star that has a tail?"

Williams: "The only one I know is Rin-Tin-Tin."

Grand Duke's Tour

The religious consciousness of the great nations of the world is awakening to the evils of the Bolshevik regime in Russia, according to Grand Duke Alexander, who is making a lecture tour of Canada and the United States. Travelling over Canadian Pacific, his tour in this country will include visits to Winnipeg and Vancouver and from the latter city he will go south to California and thence back to New York. In the two sessions he has been lecturing he has delivered 52 addresses in 32 Canadian and American cities.

Prizes For Good Seed

Saskatoon Board Of Trade Announces Interesting Competition

To encourage the growing of good seed, and to stimulate efforts to produce prize-winning exhibits for the World Grain Show, at Regina, in 1932, the Saskatoon Board of Trade, has announced a \$350 competition for wheat grown in 1930, to be exhibited some time during the winter, possibly at the 1931 winter fair. This will be open to farmers within a radius of 50 miles from Saskatoon.

The grain for this exhibition must be grown from third generation No. 1 Marquis

British Medical Association

More Funds Required To Finance Big Meeting To Be Held In Winnipeg

The committee of medical men in Winnipeg who are in charge of the arrangements for the meeting of the British Medical Association in that city next summer, have requested Manitoba members of parliament, particularly Dr. J. P. Howden, of St. Boniface, to ask the Federal Government for more financial assistance.

The meeting of the British Medical Association will be an event of historic importance. It is 84 years since the association met in Canada, the last occasion being in 1906 when the meeting took place in Toronto.

It is estimated that the cost of looking after the delegates, providing entertainment for them and suitable accommodation for their sessions, will be \$60,000. It is understood here that this does not cover the expenses of the delegates in any way, shape or form. Each delegate will come from Great Britain at his own expense.

So far the Federal Government has agreed to give \$20,000 to the committee. It is believed that the provincial government of Manitoba is giving \$10,000. And the city of Winnipeg \$10,000. This still leaves \$20,000 to be found. The Canadian Medical fraternity are subscribing privately to a fund to be used for the meeting, but it is thought that in order to make the event certain of success a further Federal grant is desirable. Dr. Howden, probably will ask for a supplementary vote of from \$5,000 to \$10,000.

Summer Tours

National Railways Makes Ready For The Holiday Season

As the sun glazes in strength and the days begin gradually, almost tentatively, to put on length, thoughts of summer crop up. With many they are thoughts of golf, with others they mean the seaside, the mountains, the woods, the lakes—travel. Excorted tours that relieve the traveller of all the irksome responsibility of details become more and more popular, according to C. W. Johnston, general passenger traffic manager, Canadian National Railways, who was discussing the system's plans for the coming summer.

Seven personally conducted all-expense tours have already been arranged, he stated, and they will take in all parts of Canada.

Two will explore the Maritimes; four will cross Canada from either Montreal or Toronto, and one from Winnipeg.

The first to get under way will be the Pitman Maritime tour, which will leave Montreal on June 27th. Occupying 17 days, the itinerary will take in Quebec, Ste. Anne de Beaupre, Montserrat Falls, as well as all the principal cities and towns of the provinces by the Atlantic. There will be a steamer trip through the Bras d'Or Lakes to Cape Breton, a motor trip of 150 miles through the land of Evangeline, and another hundred miles through Prince Edward Island. One of the most important tours of the summer will be that organized under the auspices of "The New Outlook," which will leave Toronto June 28th, and will cover 5,000 miles by rail, 1,500 miles by steamer, and 850 miles by automobile. Both railways will be used and among the stops to be visited will be Jasper National Park. The "Pilgrims" will travel between Vancouver and Prince Rupert by Canadian National steamer, and will also visit the Peace River Country.

The ninth annual personally conducted tour of the Canadian National, also System will leave Winnipeg on July 2nd, crossing the prairies to the Pacific Coast and including the boat trip along the "Inside Passage."

On July 10 and July 16th, respectively, the Adams and Pitman "Across-Canada" tours will leave Montreal, on the way to Minaki, Jasper National Park, Wainwright and the Pacific Coast. The first will be for 24 days and the second 26. Western Canada will also be visited by the Kerr-Bryson sixth annual tour, which is due to leave Toronto on July 9th. All the salient features of the Maritimes will come before those who become members of the Adams Maritime tour, leaving Toronto on August 5th, and Montreal, August 7th.

Griddle Cakes

Tested Recipe Is Herewith Given Which Should Give Good Results

Who doesn't like griddle cakes? From father to the youngest member of the family, every one clamors for more—when they are tasty! Here is a tested recipe:

1 cupful Borden's St. Charles

Milk.

1 cupful water.

2 tablespoonfuls melted butter.

1 egg, well beaten.

3 cupfuls white flour.

1 teaspoonful salt.

4 teaspoonfuls baking powder.

2 tablespoonfuls sugar.

Combine the milk and water, add the shortening, sugar, and the egg, and beat in the dry ingredients which have been sifted together.

Beat thoroughly and fry as usual on a slightly oiled griddle, or on an un-oiled aluminum or soapstone griddle.

If very thin cakes are desired, add two more tablespoonfuls of St. Charles Milk and water. For further interesting recipes write for the Borden Cook Book, addressing The Borden Co., Ltd., Dept. W.L., 140 St. Paul W., Montreal.

Radio has proven to be a great boon in one Chicago apartment house, where the landlord is reported to have accidentally hung himself while putting up an aerial.

Mrs. S. A. Daniels, of New York, is 80 years old, and still carries on the business of cobbler which she took over when her husband died 30 years ago.

AVOID IMITATIONS

B.C. Man First Member

Application and Fee Received By World's Grain Conference Office

The honor of becoming the first member of the world's grain exhibition and conference goes to Cecil Tice, provincial agronomist, British Columbia. His application and the fee of ten dollars were received at the office of the exhibition at Regina recently.

From Lima, Peru has come the first acceptance of the invitation to participate in the exhibition. Due to its diversified climate, practically every agricultural product known to man can be raised within the borders of Peru.

The first prize of \$2,500 for wheat, the largest cash prize for any kind of grain offered at any exhibition has aroused the interest of grain growers all over the world.

There is but one class in the Hemp section for seed of any variety. The exhibit must bear the variety name and consists of 30 pounds. There are twenty prizes for Hemp seed grading from \$75 down to \$12.

PALPITATION

Throbbing of Heart After the "Flu"

Mrs. J. Cunningham, Sault Ste. Marie, Ont., writes: "Last February I had a severe attack of influenza which left me with palpitation and throbbing of the heart."

"I felt very weak and tired so began to take

and used about six boxes and have found them help me a great deal, and am very thankful for having found such a good medicine."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Month Without Full Moon

February, 1930, was the most remarkable month in the history of the world. There was no full moon! That same year, January and March had two full moons each. This never happened before and will not happen again for 500,000 years.

Denmark has adopted a "standard" type of pig.

SUNDAY SCHOOL LESSON

APRIL 13

THE CHILD AND THE KINGDOM

Golden Text: "Suffer the little children, and forbid them not, to come unto Me; for to such belongeth the Kingdom of heaven."—Matthew 19:14.

Lesson: Matthew 18:1-14; 19:13-15. Devotional Reading: Psalm 24:1-6.

Explanations and Comments

The Kingdom of Heaven Is Entered by the Childlike, 18:1-4. In answer to the disciples question, "Who then, is greatest in the Kingdom of Heaven?" Jesus called to him a little child (possibly Peter's), if they were in Peter's house at Capernaum at the time, and putting him in the midst of the disciples said, "Except ye turn, and become as little children, ye shall in no wise enter into the Kingdom of Heaven."

The double Greek negative in the last clause is most emphatic; far from being the greatest in the Kingdom of Heaven, they were in danger of never entering it. They must turn from their wrong ambition and jealousy, and become unpretentious, humble as little children. A child has no thought about greatness. "Jesus does not say that the childlike spirit is inherently better than the spirit of the man. He does not promise that it shall possess or govern the Kingdom of Heaven, but that it is the condition of entering the Kingdom. It is not that the child is better than the man, but that the child stands at the gate of the ideal and takes the first step toward the Christian character. Docility, receptivity, open-mindedness, the eager listening spirit of the little child—this is the polar opposite of the unteachable, satiated, closed heart of the Pharisee, and as the latter blocks the way to the Kingdom so the former opens it. Better things than childhood has to offer are to be gained through the discipline and stress of life, yet entrance to the Kingdom is attained by no other door than the childlike, spontaneous spirit of the child, and many a sophisticated adult, who has lost the childlike spirit, will find a shock of surprise that it has lost the key."—F. G. Peabody.

Better Feed Standards

New Regulations Require a More Careful Elimination Of Weed Seeds

Better feed and hay is assured by the new regulations of the seed branch of the Dominion Department of Agriculture, which require a more careful elimination of weed seeds. Under these new regulations, while wild oats and other grains present are taken into consideration, the quality of the grain itself now mainly determines the grade.

In the past there have been frequent complaints, especially from the eastern feeders, of the excess of weed seeds contained in feed grain from the west. Under the grain inspection practices now in force even the lowest grades of feed oats and barley may have not more than 3 per cent. of weed seeds.

With this new system of inspection in operation, eastern feeders will be able to buy oats and feed barley on certificate, and with much greater assurance as to the cleanliness and quality of the grain so purchased.

The one proper place for a knocker is outside the door.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect. Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy. A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleaned and constipation poisons pass away. The stomach and liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red packages.

Huge Copper Nugget

St. Hundred Pound Nugget From Northern Hinterland To Be Sent To National Museum

A 600-pound nugget of native copper will shortly be added to the national museum exhibits. The nugget was found at Husky Creek, in the Coronation Gulf district, by Major L. T. Burwash, of the Yukon and North West Territories branch of the Department of the Interior on August 4 last year.

When he found the lump of copper, Major Burwash carved his initials on it and made arrangements to have it transported by dog sled from Husky Creek to Coronation, Gulf station, from where it will be brought to Ottawa by rail and boat. It will probably arrive in October.

Regina Largest Distributor

Regina is described in International and Commercial publications as the largest distributing centre of West and Central Canada and the great centre for the distribution of farm implements in the world. In the latter business a turn over of \$25,000,000 is reached every year.

TWICE BENEFITED BY SAME REMEDY

Recommends Lydia E. Pinkham's Vegetable Compound

Coburg, Ontario—"Years ago when I had a sick father and a nursing baby to care for, I got all run down and I took Lydia E. Pinkham's Vegetable Compound and it gave me strength to do my work. Another time at Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."

—Mrs. J. E. Staszewski, R. R. 4, Coburg, Ontario.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Taxation

Problems of taxation, Federal and Provincial, and to some extent municipal, are subjects of consideration at a conference in session at Ottawa as this article is written between the Finance Minister of Canada and the Treasurers of the several Provinces. Methods of taxation constitute a problem in which all men entrusted with the responsibility of Government and the administration of public affairs must be and are deeply interested. They are not backward in displaying that interest, nor can they be accused of delinquency in imposing taxation, whatever other charges of neglect may be laid at their doors.

If members of Government, who are responsible for the imposition and collection of taxation, are thus deeply interested, how much more vitally interested should the people as a whole be who have to pay the taxes. It is regrettable, however, that a large percentage of the taxpayers give little thought or study to the subject except to give voice to criticism and complaints when paying their tax bills. The men and women who pay the taxes should be more keenly interested in the whole subject of taxation than are members of Government whose duty it is to impose, collect and then administer those taxes.

Every citizen should make it his or her business to learn everything they possibly can about this subject. They should study the form of taxation imposed on them; the scope of it; how the taxes are collected, whether economically or otherwise; whether unnecessary duplication in imposition and collection exists; and, finally, to what extent each particular form of taxation places a handicap on business, industry and national development. In a word, each citizen should endeavor to find out whether our systems and methods of taxation are serving their avowed object, or are really operating so as to limit the ability of the people to pay taxes.

According to newspaper reports suggestions for simplifying the imposition and collection of certain taxes have been advanced by Provincial representatives at the Ottawa conference, but these do not seem to meet with much favor by the Federal authorities. Under the British North America Act, the Provinces are limited to the imposition of direct taxes, and prior to the war the Federal Government refrained, for example, from imposing a tax on incomes. But the stress of war finance forced the adoption of a Dominion Income Tax. In some Provinces there are now three taxes levied on incomes, Federal, Provincial and Municipal. In other Provinces there is either a Provincial or a Municipal Income Tax as well as the Dominion tax. It is contended, therefore, that if the Dominion is by force of necessity compelled to maintain its income tax, it should make itself responsible for the collection of the whole of the taxes on income and rebate a stated percentage to the Provinces, thus doing away with much duplication and expense in collection.

This seems a sensible and economical proposal and one which undoubtedly would appeal as businesslike to a majority of the people. But Governments are notoriously reluctant to collect taxes for other Governments, and rather than do so the people are forced to put up with and pay for much otherwise unnecessary duplication. "It is time the people made their voice heard in the matter. It is their money that is at stake."

The Finance Minister at Ottawa should give heed to the representations of the Provinces, and careful consideration to the views set forth in the memorandum submitted by Provincial Treasurer Bick, of Manitoba. Provincial policies and services do not impose additional expenditures on the Federal Government, but many Federal policies do compel larger expenditures by the Provinces without any compensating increase in Provincial revenues. For example, immigration expenditures by Ottawa mean additional population, and additional population results in increased Federal revenues through Customs, Excise, Post Office, etc., etc. But to the Provinces increased population means larger expenditures for roads, bridges, ferries, schools, administration of justice, etc., etc., with only a paltry return by reason of the per capita allowance from Ottawa.

The Dominion Government, too, has the whole field of taxation, direct and indirect, open to it. Its power to levy taxation is, therefore, elastic. But the power of the Provinces is limited. The Provincial requirements and expenditures are increasing without any corresponding increase in revenue. Not only is such a situation impossible for the Provinces and municipalities, but, as Mr. Bick points out, it must in the long run adversely affect the whole Dominion because neither Dominion policies or finance can be maintained in a healthy state if the Provinces and municipalities are financially embarrassed.

The whole subject of taxation in Canada requires careful study and wise overhauling, and in this work the interests of the taxpayer rather than of Governmental bodies elected to represent the taxpayer should receive first consideration.

A Real Blow
Captain Found Young Officer Was Not So Stupid
It was the midday's duty aboard ship, and the captain, who had had a pretty thick time of it the night before, was in consequence in no very gracious mood when the budding officer presented himself. "Good morning," he growled, "fool of the family sent to the navy as usual, I suppose." "No, sir," came the reply; "I believe things have altered a little since your day."

The ostrich feather industry in South Africa is on the decline.

Minard's Liniment Relieves Neuralgia

Prevention Of Cancer

Free Use of Soap and Water Advised

By Medical Man

The medical profession should interest itself in cancer prevention before conducting a research into what cancer really is, in the opinion of Dr. James Ewing, professor of pathology at Cornell Medical School, who addressed the Ontario Academy of Medicine at Toronto. A few of the striking statements made by Dr. Ewing were: That a more violent use of soap and water would prevent much of the cancer of the skin.

Cancer of the stomach was seldom developed from ulcers of the stomach. Cancer of the mouth, tongue and lips was usually caused by the use of tobacco or by bad teeth. Cancer was usually caused by constant irritation, over a considerable period of time. He expected to see a large increase in the number of cancer cases among automobile mechanics, due to their hands and arms being coated with oil.

COLOR IT NEW WITH

"DIAMOND DYES"

Beautiful home dyeing and tinting guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Transmit Power By Wireless
After 15 years of experiments, a Vienneuse carpenter named Schapelle has succeeded in transmitting high-power electric current by wireless.

Minard's Liniment Used by Physicians

Radio Signal Around the World

Eastbound Signal Wins Race By One Second

Two radio signals were flashed in the opposite directions around the world from the third annual National Exposition in Grand Central Palace, New York, and the eastbound signal won the race by one second.

The letter C, sent eastward, completed the circuit in five seconds, while the letter S made the westward journey in six seconds. The difference in time was due to the fact that the winning signal was relayed only three times while the westward signal was handled by one additional relay station. The relay points were: Eastward, Paris, Saigon, in French Indo China, and San Francisco; westward, San Francisco, Honolulu; Malabar in Java, and London.

Predicts Cheap Aircraft

Will Be Sold For \$500 Says Airplane Manufacturer

H. G. Fokker, the airplane manufacturer, predicts that within 20 years aircraft will be selling for \$500.

"Almost everyone will be flying then," he says, "because planes will be less expensive than motor cars. I am convinced that within ten years we shall be crossing the Atlantic within twenty-four hours, carrying passengers and mails."

Mr. Fokker says that 90 per cent. of the planes now being built in Europe were for the military and naval purposes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Extirminator.

Some wives get comfort out of the thought that their husbands are just as good as other men when they are asleep.

Urges ZR-3 For Pole Trip

The ZR-3 can make the trip to the North Pole, explore the Arctic Circle and blaze an air trail across the top of the world, in the opinion of Captain Robert Bartlett, Arctic explorer.

Asthma Brings Misery, But Dr. J. D. Kellogg's Asthma Remedy Will Relieve

Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction ceases and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home to-night. Try it.

One of the most valuable documents stored in Somerset House, England, is the will of Shakespeare.

Wool From Trees

A substance that has many of the qualities of natural wool has been produced from the long, slender spines of the Scotch fir by German scientists. This wool can be curled, felted and spun or woven into carpets, and, mixed with a canvas warp, makes excellent blankets. The coarser qualities are used for stuffing mattresses and have been found proof against insects, while the aromatic odor is said to be agreeable and beneficial to patients.

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children.

These powders will clear the system early of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

It takes two to make a quarrel, but a dozen or more generally take a crack at it before it is patched up.

Alberta Boundary Established

Line Between Alberta and B.C. Now Fully Located

After 11 years work on the boundary line between British Columbia and Alberta, R. W. Cautley, engineer, has completed the undertaking. This year the surveying was done in the mountain country and passed near the Smoky River.

The border between the two provinces is now fully located and staked off from the international boundary to a point on the meridian north of the Peace River block. It is expected that it will not be continued further north until such time as development in the northern portion of the provinces necessitates further boundary surveys.

J. L. McRory

Recital Well Attend ed

The recital given on Wednesday evening by Miss Mary Abell and her pupils was a decided success. Some of the performers especially among the younger ones showed signs of nervousness but apart from that all did very well. One pleasing feature was the fact that the boys took their places in the recital and did exceptionally well.

Valuable assistance was given by Mr. Olson, violinist and Mrs. Young, soloist. The audience showed that these local artists are much appreciated. The number when Mrs. Young sang "One Fleeting Hour" accompanied by Mr. Olson playing an obligato on violin and by Miss Abell on the piano was one of the outstanding numbers.

During the intermission a lovely basket of carnations and sweet peas was presented to Miss Abell by some of the pupils.

Inverlea News

Over fifty people were present at a large party last Friday evening which gathered at the home of Mr. and Mrs. Brandon in honor of Mr. and Mrs. Ash and family who are leaving this district shortly.

During the evening, Mr. Ed. Smith on

behalf of neighbors and friends in the district presented Mr. and Mrs. Ash with a farewell gift accompanied by very best wishes for their future. Miss Mary Brandon on behalf of the Inverlea school children, presented each of the Ash children with a little farewell gift.

Mr. Ash in a few well chosen words replied for himself and family.

Mr. and Mrs. Alex Fraser were visitors to the city on Friday and Saturday.

The last two weeks the Inverlea notes arrived after the paper had been mailed.

Wedding Bells

Lightfoot—Duthie

A quiet wedding took place at Knox United Church, Calgary, on Saturday, April 5th at three o'clock in the afternoon, when Howard T. Lightfoot of Crossfield and Alice Mary, only daughter of Mr. and Mrs. Duthie of Crossfield, were united in marriage. Rev. G. Dickson officiating. Miss Clara Lucas of Ponoka, attended the bride, and Mr. Wilbur Ellis of Calgary was groomsmen. Mr. and Mrs. Duthie will reside near Crossfield.

The funeral of the late Mrs. J. L. Crawford of the Rodney district will be held tomorrow. Rev. H. Young taking the service.

Local Breeders Do Well At Calgary Spring Show

Early in its history Crossfield came to the front with its production of high class cattle, and year by year it has added to the long list of successes in the sale ring as well as in the show ring. At the Calgary Spring Show last week, Crossfield district contributed twenty-four entries; 16 Herefords, from the herds of F. Collicutt, J. H. O'Neil and Garnet O'Neil, F. Ruddy; also 8 Short-horns from the herds of G. K. Allonby, Roy Adams, E. Adams and R. J. Hendry.

The Crossfield contingent made made a great display, most of the stock being in tip top shape and the lot certainly formed a shipment worthy of the district.

The Herefords brought the longest prices at the sale.

The total number of entries of all classes was 521, realizing \$115,475.00, with an average all round of \$217.47.

Local and General

Syd Jones was a business visitor in Carstairs on Tuesday.

Miss Helen Willis left for Calgary on Sunday to go in training at the General Hospital.

John Terkuil purchased a 20-run double disc Cockshutt drill from Tredaway & Springsteen on Wednesday.

R. W. Bro. J. T. McDonald, P. G. M., of Calgary, visited the local Masonic Lodge on Tuesday night.

As we go to press we have been informed of the death of Mrs. J. A. Aldred, who passed away at her home east of town this afternoon.

A Vestry meeting of the Church of Ascension was held at the home of Mr. W. Major on Tuesday night. Mrs. Major served a sumptuous lunch at the conclusion of the meeting.

Gibson Bros. & Wallace made the following deliveries during the past week: Drills to L. D. Shand, J. P. Metherall, and Dave Gerlitz. Pong press drills to E. J. L. Morgan, Dave Cummings, Chris Christianson. Plows to Lee Ableman, Frances Hogan, Kenneth Cameron.

Chautauqua is Coming

Miss McKechnie of Canadian Chautauqua was a visitor in town last week and had no trouble in securing 40 signatures to the Chautauqua contract, which assures Crossfield of a four day Chautauqua this fall.

"It brings to within the reach of everybody its inspiring and helpful programmes at a very small cost. The Chautauqua should have the support of everybody."—St. Mary's Journal, St. Mary's, Ont.

NO AID FROM OTTAWA FOR UNEMPLOYMENT

Ottawa.—Ottawa will not provide "a five-cent piece for any Tory government" in any of the provinces for unemployment relief, Premier W. L. Mackenzie King told members of the House of Commons. This attitude was taken by Premier King, when he spoke in the debate that was precipitated by A. A. Heaps (Lab., Winnipeg North). The Labor member moved an amendment to the motion to go into supply, urging that the government take immediate action to deal with the unemployment situation.

The Federal Government is without power to embark upon social legislation like unemployment relief, for the British North America Act invests the province with all jurisdiction in matters of this character, the premier held. His remarks caused a sensation in the House and there were conservative cries of "shame" when he declared that the Federal Government, after reducing taxes and adding to the exchequer since 1921 was not prepared to distribute these savings among the Conservative governments of Saskatchewan, British Columbia, Ontario, New Brunswick and Nova Scotia.

Any government headed by a Progressive premier would be looked upon with favor in regard to unemployment relief. He said that no request had come from the Alberta or Saskatchewan governments for relief.

The prime minister spoke for two hours. He did not believe there existed in Canada at present an emergency which would justify the Federal administration in embarking on any program of unemployment relief or engaging in any scheme of unemployment insurance. There must always be a certain amount of seasonal slackness in outdoor work during the winter months in Canada. That had always been the case and always would be. He did not feel that the Federal Government was called upon to ask the taxpayers to bear a burden which rightly lay on the provinces.

On Monday last, said Prime Minister Mackenzie King, he had moved the House into committee of supply, but Mr. Heaps had moved an amendment requesting the government to act in the matter of unemployment. The House was far from united as to what was in Mr. Heaps' mind. One phase that had been emphasized was that unemployment was a national problem. He didn't think this could be questioned, but a great deal depended on what inferences would be drawn from it. If it meant a national problem to the exclusion of the provinces and municipalities, then the point could not be admitted.

There must be, in an endeavor to meet this problem, some division of labor, Mr. King said. The League of Nations may do something to a solution, but its role would be very different from that of a municipality. Because it has been conceded unemployment was a national problem, some members had inferred that an emergency measure which the Federal Government should deal with. Some scheme of social legislation in the form of unemployment insurance had been suggested.

No request from Alberta or Saskatchewan, he said, had been received for unemployment relief. Yet, the premier stated, "we have been in touch with the premiers of these provinces on the question of natural resources." The premier of Manitoba had not asked for any assistance, he continued, nor had the premier of Ontario made any such request. "And," the prime minister asserted, "we have a wire from the premier of Quebec that he does not want any assistance."

The premier of New Brunswick, he said, had not, he declared, sent any communications for relief. The only request was from a "few gentlemen" who had come to Ottawa, Premier King said.

There had been no representations, Premier King stated, except from some parts of Western Canada, and chiefly from those who wished to take a certain attitude on the budget debate and desired to indicate that an emergency existed.

HAOR POSTPONES TEST

Daytona Beach, Fla.—Kaye Don, British racing champion, announced he has postponed indefinitely his proposed assault upon the world automobile speed record because of unfavorable beach conditions.

W. N. U. 1832

Question Of General Election Discussed

But No Official Statement Is Issued

Ottawa, Ont.—The question of a general election was discussed at a recent caucus of the Liberal party. While no official statement was issued at the conclusion of the meeting, it is understood that Mackenzie King stated that he was not more decided whether to hold an election this year or in 1931, than he was three months ago. But, at the same time, it is said the prime minister warned members they should be in good preparation and continue to make preparations.

The views of a number of private members were expressed; and, it is understood, that in the course of this discussion a suggestion was made that August 25 next, might possibly be the date for an election.

At the Top Of the World

Folks Get the Blues When It Is Mid-Winter In the Arctic

Winnipeg, Man.—All the top-of-the-world folk get the blues when it's mid-winter in the arctic. This is the comment of William Murray, manager of the Hudson's Bay Company post at Herschel Island, off the north shore of Canada. He refers to the brief period when daylight is a generous word for two hours of murky twilight.

From November 26 until January 16, observes Mr. Murray, no sun is visible at Herschel Island. Little or no travelling is done although there is fairly good light at mid-day, when a red glare appears in the southern sky. For days before the sun's return natives stand eagerly on top of their igloos seeking first glimpse of Old Sol.

Menaced By Oil Gusher

Fire Hazard Threatens Lives and Property Of Oklahoma

Oklahoma City, Okla.—A great gusher roared like a young volcano in the backyard of Oklahoma City, while men made futile efforts to control a spot of gas and oil unleashed in the race for riches.

The gusher has driven inhabitants from its environs, deluged the section with a thick coat of petroleum, through which even trucks cannot pull, filling ravines with gas and threatened lives and property with a fire hazard.

A gale, driven by the tremendous flow of gas released into the sky, might strike the spark which would envelop the countryside in flames.

Reserve Bank For Australia

If Established, Will Have Ten Million Pounds Capital

Canberra, Australia.—Hon. E. G. Theodore, Commonwealth treasurer, introduced in the House of Assembly a bill to create a central reserve bank similar to the Central Reserve Bank of South Africa. The bank will have a capital of \$10,000,000, drawn from the Commonwealth funds, and the board will include representatives of Labor.

The proposal marks another step in the Labor government's comprehensive program, for restoration of the economic and financial position of Australia, a program which also includes a compulsory wheat-marketing pool.

War Reparations

Ottawa, Can.—Canada has received \$19,151,436 in payment of war reparations, Hon. Fernand Tuffert, secretary of state, informed the House of Commons in reply to a question from Earl Lawson (Con., Y.P.—all).

The question also covers claims paid out of the reparations commission. The reply so this was that no sums were paid out of the amount received for reparations. Payments were paid under the provisions of the reparation payment act.

U.S. Authorizes Commission

Washington, D.C.—The McNary bill to create a commission of three persons to co-operate with Canada in considering the feasibility of constructing a highway to connect the northwestern part of the United States with British Columbia, Yukon Territory and Alaska, was passed by the Senate and sent to the House.

Might Suggest Dissatisfaction

Ottawa, Ont.—For Canada to adopt another flag beside the Union Jack might indicate or suggest some dissatisfaction with the present position of this country within the Empire, Robert S. Smith, member of parliament for Cumberland County, N. S., told members of an Ottawa service club.

Famine Takes Heavy Toll

Hundred Die Every Day In Chinese Province Of Shensi

New York, N.Y.—People are dying at the rate of one hundred a day in the plains of the Shensi province in the famine stricken area of China, according to a report received from Mrs. Philip S. Dutton, at Taihu, in North China.

Mrs. Dutton, formerly of Sault Ste. Marie, Mich., estimates that by the beginning of summer two-thirds of the population will be dead. The inhabitants, she says, are tearing down their houses and selling the material to obtain money for food. In every yard is a pile of leaves which the owners are eating. When the leaves are gone they will die. Mrs. Dutton says.

STUDY VARIOUS PROBLEMS OF GRAIN INDUSTRY

Ottawa, Ont.—Three fellowships established by the Canadian Wheat Pool to further scientific research in problems of the Western Canadian grain industry, each having an annual value of \$1,200 have been awarded by the National Research Council.

As announced the successful candidates are: R. G. Dunlop, B.Sc., University of Saskatchewan, who will undertake research in the Department of Field Crops and Plant Biochemistry of the University of Alberta.

H. E. Salans, B.Sc., University of Saskatchewan, who will undertake research in the Department of Wheat Chemistry, of the University of Saskatchewan.

C. A. Winkler, B.Sc., University of Manitoba, who will undertake research in the Department of Agricultural Chemistry of the University of Manitoba.

Sixty-five persons have been successful in securing a national research council post-graduate research scholarship, tenable in Canadian universities during the year 1930-31. This year considerably more than twice as many applications were received as there were awards available, says a statement issued recently by the Research Council.

Three classes of post-graduate scholarships are awarded, known as bursaries, studentships and fellowships, having an annual value of \$750, \$1,000 and \$1,200 respectively. These awards are provided to enable Canadian students who have graduated with distinction from a university to continue their training in science until they have qualified for a Ph.D. degree in order to build up a corps of thoroughly trained research workers for service in Canadian industries, universities and in the technical departments of the federal and provincial governments.

Surveyor-General Named

Victoria, B.C.—Official announcement was made by the government of the appointment of F. C. Greig, Victoria, to the position of surveyor-general of British Columbia, to fill the vacancy caused by the death of J. E. Umach.

Liquor Vessel Seized

Boston, Mass.—The British two-masted schooner "Arcturion," with 800 cases of liquor aboard, was seized off the coast of Maine by a coast guard patrol boat recently, Thomas F. Finnegan, in charge of the custom enforcement squad here, announced.

MAROONED AVIATORS RETURN TO CIVILIZATION

J. D. Vance and Brian Blaisdale, Northern aviators who made a forced landing at Baker Lake last November while searching for the McAlpine party, and had to spend the winter at Baker Lake, arrived in Winnipeg over the Canadian National Railways from Churchill on March 29. They came out to the end of steel by dog team, and at Mile 327, on the Hudson Bay Railway, they were met by the photographer of the Canadian National Railways who made the above photo in the clothes the Eskimos made for them. Vance is seen on the left and Blaisdale on the right.

BRITISH AMBASSADOR TO U.S.

Sir Ronald Lindsay, new British ambassador to the United States, who, with Lady Lindsay, has just arrived at Washington, D.C., to take over his new duties.

Cosgrave Re-Elected

Retains Presidency Of Irish Free State Executive Council

Dublin, Ireland.—William T. Cosgrave was re-elected by the Dail Eireann to serve as president of the Irish Free State executive council. He thus maintained his ascendancy over Eamon de Valera, campaigner for an "Irish Republic."

Cosgrave who had been defeated by a narrow margin recently on an old age pensions bill, was chosen for his old post by the Dail after De Valera and the Laborite leader, T. J. O'Connell, had been thrust aside in turn.

The successive votes were: For De Valera: 54 for, 93 opposed. For O'Connell: 13 for, 78 opposed. For Cosgrave: 80 for, 55 opposed.

Pay Tribute To Writer

Memory Of Hans Christian Andersen Is Honored At Copenhagen

Copenhagen.—One hundred thousand persons gathered at the town hall here to sing the national anthem in memory of Hans Christian Andersen, writer of fables and fairy stories.

Two Copenhagen officials spoke in English, French and German concerning Andersen's humble birth 125 years ago, and their words were broadcast throughout Europe.

Members of the diplomatic corps paid homage at the grave to the man who enriched the simple imaginative literature of all lands and paved the way for the modern bedtime stories.

High Prices For Livestock

Calgary, Alberta.—Forty mature Aberdeen-Angus bulls brought an average price of approximately \$150 each at auction during the opening session of the Calgary spring sale.

A total of 15 animals were sold including a number of yearlings, which were less in demand, the average for the animals of this breed being \$171.

Deputy Warden Transferred

Kingston, Ont.—It has been announced at Portsmouth penitentiary that Deputy Warden Robert E. Tucker is being transferred to Saskatchewan penitentiary at Prince Albert. Mr. Tucker came to the Portsmouth prison as chief keeper in 1914.

Navigation To Open Soon

Buffalo, N.Y.—Navigation on the Great Lakes is expected to open about April 20, according to Captain Dan H. Bowen, manager of the Seattle Ste. Marie Marine Bureau.

Doukhobors On Rampage

Eight Fanatics Stage Nude Demonstration At Nelson, B.C.

Nelson, B.C.—A nude demonstration Sunday by eight non-community Doukhobors, who interrupted the preaching of Peter Veregin at the annual meeting of the Christian Community of Universal Brotherhood, at Brilliant, was followed by further disorders Monday night by about 200 who did not go to the extent of disturbing. The provincial police from Nelson were called out to maintain order.

The demonstration resulted in a committee being appointed by the conference to interview the malcontents and offer them a tract of land in the Slokan Valley for their use, provided they would agree to be law abiding, to send their children to the schools, and to pay lawful taxes. This offer was rejected by the disturbers, who demanded the privilege of living in close association with the community without obligation to pay rates or obey the laws. They were then requested to leave.

Carried By Large Majority

Jews In Quebec Are Granted Separate School Rights

Quebec, Que.—By a vote of 52 to 5 the Quebec Legislative Assembly approved of giving separate schools to the Jewish people on the Island of Montreal.

Hon. Athanasie David, provincial secretary, explained the bill, and said it spoke for the attitude of tolerance which this province has always taken as regards minorities. Premier Taschereau made it clear he stands against the neutral school, and for this he also favored the bill. He hoped if Jewish schools are established they will be along lines of good Canadian thought.

LIQUOR EXPORT BILL OPPOSED IN THE SENATE

Ottawa, Ont.—A declaration by Senator Charles E. Tanner, of Halifax, that in his opinion the government bill to prohibit liquor clearances to shipments destined for the United States appeared to have been "dictated from Washington," featured discussion of this measure in the Senate.

The entire time of the Senate during a brief sitting was devoted to discussion of the bill. Senator Tanner occupied the major part of the time in a lengthy speech supporting the Conservative amendment to the motion for second reading.

This amendment which was moved by Senator W. B. Willoughby, Conservative, in the Senate, asked that the bill be not read a second time at present, "but that it be referred to a special committee, to be selected by the Senate, for the purpose of first obtaining information as to the effect the passing of the bill would have on the economic, national and international conditions and relations of Canada."

Sensor Tanner asserted that the bill could commit Canada to a policy of the prevention of liquor export to the United States.

"The more we give these people, the more they want," said Senator Tanner, with reference to the United States. As far as the government of the United States was concerned he considered it both "relentless and selfish." The United States, he declared, always got the best of any bargain that it entered into with Canada.

"Are they taking our interests into consideration in the tariffs they are framing?" asked Senator Tanner, in elaborating on his declaration that the United States consequently looked after its own interest exclusively. "How about the Chicago diversion? Are we getting any nearer to a solution of that?"

Sensor Tanner said that the United States representatives in London today were saying: "Here we are. If you care to come to our terms there'll be an agreement." The senator expressed admiration for the point of view which he attributed to the United States. They were looking after their own interests, and he wished that the government of Canada would take a similar attitude in respect to the Dominion.

There were two other speakers, Senator Nathaniel Curry of Nova Scotia, said he would not vote for the bill. In his opinion withdrawal of Canada's liquor exports from the United States would not affect the situation in that country. Canada exported about two per cent of the liquor consumed in the United States. Illicit manufacturers would very soon make up that deficiency.

BRANCH LINES TO SERVE NEW WESTERN AREAS

Winnipeg.—Covering nearly 90 miles leading into rich agricultural territory in Saskatchewan from Prince, the Canadian Pacific Railway has just let contracts for grade construction of four branch lines, it was announced by D. C. Coleman, vice-president of western lines.

These touch Chislehead and Prince Albert, Sonningdale, Rockglen, and Leduc. The contracts cover less than half of the railway's present grading program, and it is expected that lenders will be let this month for a substantially increased amount for branch lines.

When completed this year, the Tufnell-Prince Albert line will give over 90 miles of new road north of the Saskatchewan River en route northwest from the new Niwapiw bridge in land so rich in agricultural promise that it is already rapidly being settled up. This branch will be a significant part of the company's lines radiating from Prince Albert. The present contract covers the road from Chislehead westerly, a distance of 25 miles.

Projected to afford railway facilities to a large number of farmers who are located south of the Saskatchewan, the Sonningdale line also traverses a rich farming district between Saskatoon and North Battleford.

From Rockglen westerly is a continuation of the company's Pike Lake branch to afford transportation to a district of exceptional agricultural possibilities that is now being settled by British families homesteading in Canada by the co-operation of the Canadian Pacific Railway and the British Government.

Approximately 20,000 acres have been divided into quarter sections farms supplied with the necessary farm houses, out buildings, horses, cattle and machinery. Additional contingents of settlers arriving this spring will profit by this transportation advantage.

The connecting of Lacombe and Western lines with Edmonton and Leduc, on the Calgary and Edmonton road, will furnish better access to the West to about 100,000 acres of land. In addition, this rounds out the plan for the entire line and makes it suitable for the improved operating conditions now under consideration. The line as now built will contain sidings and the haul for large numbers now engaged in mixed farming.

Early Seeding Operations

Saskatchewan Farmer Has Sown 200 Acres Of Wheat

Saskatoon.—Here's a record in spring operations for farmers of the West to shoot at. Thomas Wilson, of Harris, 50 miles southwest of here, had sown nearly 200 acres of wheat when his outfits pulled out of the fields recently.

Mr. Wilson, who is one of the "Big Four Farm" brothers, found the soil badly in need of moisture. For a depth of eight inches the land was like powder, he said. A. A. Wilson, who farms at Grasswood, four miles south of here, has plowed up 20 acres of brome grass. He plowed four inches deep and found no frost.

Outrages At Neudorf

Reward Of \$500 Is Offered For Conviction Of Offenders

Neudorf, Sask.—The municipality of McLeod has offered a reward of \$500 for the conviction of the parties believed to be waging a vendetta against Louis Ulmer, a farmer of this district and his family. Last September, when the farm was in possession of Ulmer's father, four horses and two cows were killed in a peculiarly cruel manner, and subsequently the granary was burned down, 1,400 bushels of wheat being destroyed. Recently two more horses, a cow and a calf were killed outright and four horses badly injured.

Australia Plans Larger Acreage Settlement.—Australia.—Addition of a million acres to wheat growing area of the state of Victoria is the aim of the state government. Hon. William Slater, state treasurer, recently announced the associated banks in co-operation with the government are making \$1,000,000 available for sowing additional wheat acreage.

All the relics of King Tutankhamen will be removed from his tomb by the end of this year.

Training the Mind Of a Child

Formative Period of the Child's Mind Is During the First Five Years

Parents of today are exceptionally lucky in the fund of scientific knowledge they have at their command, as to the feeding and care of their children. In these days of broadcasting, health advice, the importance of health literature, and forming of health centres, there is little or no excuse for sickly children, who are the prey of disease. Vaccination and inoculation remove many of the dangers of infectious diseases and the discovery of the value of sunlight and proper food in preventing others tend to remove the menace to the bodily health of our children.

The one subject in which all psychological investigators agree, is that the training of their children in the home by the parent, during the first years of their lives, is the most important factor in developing well-balanced adults free from mental and moral abnormalities.

Although the adult human had so much greater powers than any other creature in the animal kingdom, the human infant is the most helpless and dependent for a longer period than any other creature. The chick can scratch for its own food and the young fish can swim alone, but the baby must be cared for throughout the first five years of its life. The ease of the parents during this period is fitting it to take its place in the world when it grows older and enabling it to become adapted to its environment. This fitting into one's environment, the psychologists say, is sanity. People who can adjust themselves to the changes life brings with it, are essentially sane, while those who shrink from reality and dwell in a world of illusion, are in some degree insane.

This business of teaching the child to become adaptable is the parents' responsibility, and the basis of bringing up children who will grow to be sane adults.

Fear is one of the things with which the parent has to cope. The infant or young child has very little sense of fear, as shown by the fact that it constantly fails to realize the dangers of fire, climbing and so forth. The child cannot be allowed to discover by experimentation the dangers of these things and so must be taught to fear them.

Aside from these natural fears which come from the instinct of self-preservation, there is a second fear, that is, the fear of situations and people which are not harmful. When a child shows fear of strangers it is due to the fact that the child is used to being with one person and he fears every one else until he is able to adjust himself to being with other people.

Fear of the darkness is another common fear of children and this is due also to the absence of his mother and a vivid imagination. These fears must not be laughed at. The parent must understand and help the child to realize that strangers will not harm him, and that the dark is the time for sleep. "Children who close their eyes do not see the dark and mother is not far away." And the child sees that while it is a baby his mother's constant care was a necessity, whereas now it should be proud of becoming self-reliant.

Fear of self is a common ailment of childhood, and if not coped with, can cause untold unhappiness in later life. It causes bashfulness and self-consciousness and the inferiority complex which we hear so much about—or, on the other hand, it may cause bullying and the desire to show off as compensations for this feeling of inferiority. If a child can be prevented from thinking too much about himself by having outside interests and interesting playmates, this fear may be overcome in childhood.

Fear of punishment or ridicule is often the basis of a habit of lying. Freud claims that the cause of all these fears is to be found in the child's emotional life. He must have proper outlets for his emotions or

they become well-sit up within him and cause the child to be at a loss for some way of expending them and they may later break out as abnormalities. A child's emotional life often is disturbed because the parents misunderstand him.

There are two recognized emotional classes—the Introverts, and the Extraverts—as one psychologist calls them.

The Introverts find it more difficult to adapt themselves to their surroundings. They are constantly turning their thoughts within rather than without to people and affairs happening around them. They are always wondering what others think of them and are usually sensitive and self-conscious.

The Extraverts are the opposite type—interested in other people and things and are usually self-reliant. Everybody has qualities of both these types, but parents try to decide in which type their children belong. They will not cause unhappiness and nervous instability in a child of the Introvert type by blaming him for taking an active part in things and not mixing well with his play-fellows.

There is a happy medium between giving a child too much adult companionship and not giving him enough. Too much makes him a spoiled child and make him too demanding when with children his own age. But too little deprives him of sympathetic understanding and the sense of self-respect which adult attention engenders in him.

Anticipation forms a health outlet for a child's emotions. Give him something special to look forward to which will break the monotony of his environment. Let him have pleasure in anticipating and thinking about it. As well as this, every child needs some sort of hobby into which he can put some of his own personality.

A child's emotional stability often depends on his parents' attitude to his mental questions dealing with sex. A child's question should be answered frankly to prevent him from thinking about the matter any further. It is when a child gets to brood over these things that his mental results follow. Parents should be the natural source of information in all subjects.

Some sort of religion whose basis is love and which he sees practiced in the daily lives of those about him, is an invaluable aid to a child struggling with the little problems which make up his life. Often a child who has no companions of his own age creates an imaginary playmate. This used to be considered abnormal and wrong, but it is now recognized as a normal child's method of making up for lack of companionship. In fact it is only bright children who are capable of creating this type of playmate and they are very real to them and they should be treated with respect by parents.

Lying is often a great cause of strife between parents and children. Professor Earl Barnes says that at the age of three it is negligible, unimportant at six, serious at nine and tragic at twelve.

This is because young children do not understand the difference between "truth-fancy and falsehood." During the first five years children are apt to talk merely for the sake of hearing themselves and do not distinguish between the products of their imagination and the facts of life. Lies are of two kinds—moral and normal. Moral lies are those which are acted out and embellished. These are usually told over a long period of time. We have all heard the type of person who tells things about their families or themselves—money or travel—which are obviously untrue. The cure for this type is broadening the child's outlook and getting him interested in some concrete thing so that he can really accomplish things, instead of telling of things he would like to accomplish in the form of lies.

Normal lies told by children of eight or so, when they have some idea of the difference between truth and falsehood are usually from some self-seeking motive—to obtain something they want or to avoid punishment. Truth telling is a product of civilization and the young child is not quite ready to take its place in this civilization. The best method of preventing the habit is to place before the child a constant example of truth-telling in all matters. Don't let him see you condoning a "white lie" or he will soon decide that truth is only for certain occasions and use this to his own advantage.

Husband (excitedly)—Where is my hat?
Wife—Hanging on that lamp!
Husband—Lamp! What? What crazy place will I find it next, I wonder?
Wife (snappily)—On your head, I suppose!

Scenes in Turkey are taking the use of typewriters since the adoption of the Latin alphabet there.

Telephone Language

Differences in Form of Speech Between London and New York

Differences between the King's English and American usage, which strike the American traveller as amusing, have caused some complications for the secretaries of the American delegation in the London Naval conference. The British "telephone" employs an altogether different set of expressions from her American counterpart the "operator." A busy line brings forth the statement, "The line is engaged." When a connection is made the expression is "You are through," which means that your connection is through and not "Your time is up; please deposit another coin."

"Hold on, there," is used for "Hold the wire." When a call is uncompleted it is announced as "ineffective." A call which is completed "matures." "Information" becomes an "inquiry desk." "They do not answer" is transformed into the more formal, "There is no reply." An "operating room" is called a "switch room" and "long distance" is "trunk exchange." When lines are "out of order" in New York, they are "not working" in London. For telephone calls the "charges" in America become "fees" in London. For what Americans usually designate as "talking" over the telephone, with the British is "speaking." —New York Evening Post.

How To Induce Sleep

People Can Take Their Choice Of Many Ways

The sleep habits of 599 distinguished men were made public at Colgate University, Hamilton, N.Y., and up-set some popular notions.

The critical age when it is unsafe to lose sleep is 35. Contrary to classical anecdotes, men of important affairs sleep about the full eight hours. It is youth instead of age that sleeps the least.

A large number of unusual personal idiosyncrasies are reported in inducing sleep. One editor of a national magazine sticks his feet out from under the bed clothes. One supreme court justice buries his face in his pillow. A young writer stands to keep his eyes open.

Three men repeat Masonic rituals. An actor-playwright repeats Christian names in haphazard fashion. A judge counts backward, or repeats the alphabet backward.

A judge thinks about the binomial theorem, extracts a few square roots in his head. A college professor eats onions. A writer of detective stories thinks about the futility of everything. One bishop thinks about things accomplished rather than those ahead, another bishop smokes and a third bishop prays.

Occurrences Of Graphite Found In Northern Parts Of Canada and Borneo

Graphite is found in Canada in the provinces of Ontario, Quebec, New Brunswick, Nova Scotia, and British Columbia, and in the northern parts of Canada in the Northwest Territories and on Baffin Island. Nearly all of Canada's graphite production comes from Ontario and Quebec, where graphite has been mined for more than sixty years, most of the producing mines and seven existent graphite concentrating mills being situated within a radius of 150 miles of Ottawa.

Probably more than one-third of the people of the earth live in China and India.

The Canadian Government's aviators mapped 63,000 square miles of territory during the 1929 season.

Walter Stein, German aeronautical expert, is coming to Canada in the hope of organizing a company to manufacture the latest model of the Focke-Wulf aeroplane. One of the company's 18-passenger Mowat transport machines is seen at the left of illustration. The Luft Hansa has ten of this model in service. At the right is a Focke-Wulf sport model doing its stuff at a low altitude. Five years of experimentation is embodied in the newly perfected curvatures of the wing-surfaces which, it is claimed, prevent spinning and provide exceptional cross-stability.

Chinese Financier

Chinese people are beginning to realize the value of currency and are learning to handle it systematically.

The financial position in China is better today, but not until the government adopts higher taxation will there be peace, is the view of K. N. Chang, president of the Bank of China, and outstanding financier of the country, who sailed from Vancouver for Shanghai aboard Canadian Pacific liner "Empress of Russia" recently. Photograph was taken on the ship.

Why People Are Bored

Do Not Take Time To Be Really Interested In Any One Thing

According to the Christian Century, as quoted by the Literary Digest, thousands of people in this modern civilization of ours are inexpressibly bored. The question in many homes is, "What shall we do?" Weary of bridge, tired of the radio, surfeited of the movies, men and women do not know what to do with themselves. This is not the general attitude by any means, for the variety of entertainment enables one to escape from one to the other. Yet this rush from one activity to another, is in itself, productive of boredom, to some people. They are like people in a motor car speeding over the highway. They go so fast they have no time to observe the beauties of nature, are presented only as a blur, and blurs are notoriously uninteresting.

The fact is that interest, in life cannot be sustained without an aim, and when an aim is lacking leisure is undesirable. The negative attitude we adopt, when we drift from pleasure to pleasure, deadens our highest potentialities, and unconscious sometimes of the reason, we grow discontented. But the reason, if we examine ourselves, is that we have chosen to be lazy when our highest impulses urged us to purposeful activity. Leisure, indeed, like life, is a good servant, but a bad master, but leisure can only be made the best of by deliberately resolving to concentrate attention upon a few things. Far better to be interested in one thing than bored by many, and the more attention is directed towards a thing, the more interest in it grows and with interest happiness. It is a sign of boredom, probably, that people are turning from novels to biography, travel and history. After a while they know all the plots, and get tired of reading of the same themes. So they take up biography and find that life itself has greater variety. But they would gain more out of literature if they were deliberately to seek to master one phase of it, instead of slipping like a butterfly at many literary blossoms, and what is more, they would not get tired up" so easily.

Phonograph records in ten different languages are sold in Egypt.

NEW TYPE OF SAFETY PLANE

Walter Stein, German aeronautical expert, is coming to Canada in the hope of organizing a company to manufacture the latest model of the Focke-Wulf aeroplane. One of the company's 18-passenger Mowat transport machines is seen at the left of illustration. The Luft Hansa has ten of this model in service. At the right is a Focke-Wulf sport model doing its stuff at a low altitude. Five years of experimentation is embodied in the newly perfected curvatures of the wing-surfaces which, it is claimed, prevent spinning and provide exceptional cross-stability.

Canadian National Hotel Appointments

C. L. Weldon Appointed Manager Of The Fort Garry Hotel, At Winnipeg

The resignation of A. W. Hodgdon, assistant manager of the Fort Garry Hotel, Winnipeg, was announced recently by A. S. McLean, general superintendent of the hotel department, Canadian National Railways.

C. L. Weldon, manager of the Macdonald Hotel, at Edmonton, will become manager of the Fort Garry Hotel, at Fort Arthur.

H. E. Perrott, assistant to the general superintendent of hotels, at Winnipeg, becomes resident manager of the Prince Arthur Hotel, and he will be succeeded in his position in Winnipeg by Charles J. Monaghan, chief clerk of the hotel department at Montreal.

C. L. Weldon, the new manager of the Fort Garry Hotel, at Winnipeg, was born in Montreal on March 29, 1891, and before joining the hotel service of the Canadian National Railways, he was engaged in hotel work in Montreal, New York, Philadelphia. In 1926 he was appointed assistant manager at Jasper Park Lodge, Alberta, and at the close of the season he became assistant manager at the Fort Garry Hotel. From there he was transferred to special duty in the hotel department at Montreal, and in 1927 he was appointed manager of the Macdonald, at Edmonton.

H. E. Perrott was born in Indiana on August 3, 1886, and went to Edmonton in 1908, where he engaged in the hotel business. When the Macdonald Hotel was opened he joined the staff there and remained there until 1926, when he spent a short time in the Fort Garry, at Winnipeg, before being appointed assistant manager of the Chateau Laurier, at Ottawa. Recently he was promoted to be manager of the Prince Arthur Hotel at Fort Arthur.

H. E. Perrott was born in Ottawa on June 15, 1888, and entered the service of the Canadian National Railways hotels as chief clerk at the Fort Garry Hotel, in Winnipeg, in 1913. He later served at the Macdonald Hotel, in Edmonton, and in 1923 he became chief clerk to the general superintendent of hotels at Montreal. In 1927 he was appointed assistant to the general superintendent with headquarters at Winnipeg.

The Bard Of Avo

Controversy Still Rages Over Authorship Of Shakespeare's Plays

One of the strangest arguments in history is the never-dying feud over the authorship of Shakespeare's or Bacon's plays. The mild debate over authorship of the American Declaration of Independence never attained anything like the prominence of the Shakespeare-Bacon controversy. A gentleman has just bobbed up in California of all places!—with "irrefutable evidence" that Bacon wrote the plays. But in a few weeks somebody in Bombay, or Batavia, will come forward with equally irrefutable evidence on the other side. We don't suppose it matters much, but if you want our personal opinion in the controversy, it wasn't Shakespeare and Bacon at all, but two other fellows.—Vancouver Sun.

One morning, when the children were eating breakfast, Milford put two heaping spoonfuls of sugar in his bowl.

"I should think one spoonful would be enough," objected his sister.

"I should think so, too," he replied, "but it's not."

Flattery is different from poison in that those who swallow it are the only ones who never turn sick.

Free Land Still Attracts

Official Figures Show Increase In Homesteading Last Year

Contrary to what seems to be a prevailing impression, the lure of free land has lost nothing of its power to attract settlers to Canada in those districts where homesteading is still available. According to the official figures about \$776,000 acres were taken up last year, an increase over 285,000 acres over the 1925 total. The aggregate of entries in 1926 for the quarter section (160 acres) of homestead land offered free to newcomers on payment of a registration fee of \$10 was 16,495, an increase over the preceding year of 1,770 entries or 11.4 per cent.

Analyzing the returns the Quebec Chronicle-Telegraph remarks that, as in 1925, the greatest number of homesteads were taken in the province of Alberta, with 9,592 entries. In Saskatchewan, 6,130 persons avail themselves of the offer of free homesteads and in Manitoba the number was 747. Each of these provinces shows considerable gain over the previous year; 20.5 per cent in Manitoba, 11.6 per cent in Saskatchewan, and 10.3 per cent in Alberta, while there was also a gain of 16 per cent in the aggregate for land in the Railway Belt and Peace River Block of British Columbia. The British Columbia entries totalled 976 in 1926, compared with 755 in the previous year.

While these homestead lands are now for the most part gone, dissection from railways and established communities, the Chronicle-Telegraph comments, they offer to the settler good prospects in view of the rapid settlement that is taking place throughout the Canadian West. From homestead areas, in the Peace River District farmers in recent years have secured off some of the most coveted squares of the International Grain and Hay Shows and other fairs and shows at which there are competitive entries from all parts of the continent.

Finds New Planet Is Frozen Solid

Receives Very Little Heat and Sends Light As Astronomers

If human beings inhabit the new planet spinning 4,000,000 miles away in space, they are hardly hot because it probably is so cold that the nitrogen could be a solid and oxygen a dense liquid.

Such was the consensus among Chicago astronomers. They pointed out that the newly discovered astral body receives only one 2,600th as much heat and sunlight as the earth. "We like to try with the idea that astronomers on the new found planet may be peering at us through telescopes," said Prof. George Van Hise, of the Yerkes Observatory, at Lake Geneva, Wis., "but if there is any form of life, we may be sure it is quite different than any on earth."

"Of course that does not mean conditions of years. Life on the earth is comparatively new."

Japs Like Department Stores

Make Visit To One a Regular Sight-Seeing

The development of large department stores in Japan is so recent that the average customer looks upon an atmosphere of modernity and luxury. The stores represent to the Japanese a super-commercial exhibition of the new and the great crowds to go shopping without any intention of making purchases. Sight-seeing parties from country districts, family groups, and bodies of students from schools may be seen in the stores at almost any time. In the summer season all of the principal stores in Tokyo place at the disposal of their customers large, attractive roof gardens.

"Can we play store in here, Mama?"
"Yes, but you must be very, very quiet."
"We'll with, Mama. We'll pretend we don't advertise."

"When I grow up I want to be a capraire."
"Do you earn much money?"
"I don't know, but it is so good for running practice."—Rages Gale Yverdon.

"How long did Smith work for you?"
"Two hours—perhaps three—he was with me six months."—Musketeer, Vienna.

If Skinny, Beware, Says Doctor. Gain Quick

New Ironized Yeast Adds 5 to 15 Pounds In 3 Weeks. New Health, Strong Nerves—Or No Cost.

"Skinny folks subject to many grave diseases," says an eminent physician. When sick they lack reserve strength and many die. Don't run risk of dangerous disease from skinless New Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ends nervousness, constipation, indigestion over night. Clears skin like magic. New pep first day.

Two great tonics in one. Weight-building Matt Yeast, and strengthening Iron. Far stronger than unmediated yeast. Results in half time. Get new health and weight quickly. Get pleasant tablets of Ironized Yeast from druggist today. Get great tomorrow. If not delighted, manufacturer refunds your money.

SILVER RIBBONS

CHAPTER VIII.—Continued

"I forgot you didn't know I was here to supper. I invited myself; and we ate in the front room so as not to miss any of the excitement! I washed the dishes while Grandma got ready for our supper. I tell you, she's some sport!"

Charlman joined in his laugh, though what she felt was a sudden desire for tears. She couldn't have said just why, but a wave of tenderness for this old friend had overwhelmed her. Jim was no kind, she told herself. What other man would have jolled an old lady all the evening, when he could have been with the young folks at the church festival? What did it matter if he was a bit under his mother's thumb?

Possibly the young man felt her yielding in some subtle way, for he said suddenly: "The moon will be full tomorrow night, won't it? Will you go for a ride, Charlman?"

They both turned at a sound behind them. The new doctor stood in the doorway, hesitating to interrupt, perhaps, but at any rate he came forward bravely and dropped the gray crepe shawl over the girl's shoulders.

"Your grandmother says you'll 'take your death o' cold,' he explained, with a grin that made him very boyish; and Charlman replied, laughing:

"Did she think I was going to stay out till morning? Good-night, Jim. Thanks for everything; and of course I'll go for a ride tomorrow evening."

Jim, who had been cursing the innocent doctor beneath his breath, and thinking that Charlman hadn't noticed his invitation, went off in such a dash that he barely escaped colliding with a lamp post.

Grandma Davis seemed none the worse for her outing. She was up for breakfast, and eager to hear the news.

"You tell me everything about the supper," she demanded, as Charlman poured the coffee. "Did you have a good time, Doctor? And was that Darling girl upset because her young man didn't show up? Did he wear the hat?"

"She did," answered the doctor. "In fact, it was the first thing that caught my eye when we arrived. It's

not a bad hat, really, and, as your granddaughter pointed out, it is becoming; but if the young lady was disturbed because you cut her out last night, she concealed it well."

Charlman threw him a laughing glance.

"Miss Darling found fresh hunting, Grandma," she explained. "Poor Jimmy was forgotten."

"You flatter me," retorted the doctor, smiling, "but I'm not sure you're not wrong; while Grandma exclaimed as he resumed his seat:

"Do you mean to say that she made eyes at you, Doctor? She must be 'broken'!"

"Am I so impossible as all that?" he asked reproachfully.

Grandma shook her head as she went on: "But you're a doctor, even if you haven't got one foot in the grave yet, and—and dignified."

"Good Lord!" he cried, disgusted, "I didn't suspect it!"

"For consolation, let me add that you are not too dignified," smiled Charlman, "but not enough so to resent the advances of—"

"Charlman," reproved her grandmother, "you shouldn't talk so—so freely to the doctor. Of course he's dignified, and a doctor has to be or folks wouldn't take his medicine. Even Edward Howe is dignified when he's a mind to be; though I remember years ago when—well, maybe it isn't nice for me to tell it, but I remember when he threw a spit ball at the teacher. It was at District Four."

"I venture to guess that the teacher deserved it," said John Carter, his eyes brimming with fun.

"That was the worst of it," went on Grandma seriously, "she didn't, though no one would have guessed it till she burst crying. She'd been snapping the children's heads off for two days, and when Edward threw the spit ball, sort-of to relieve everybody's feelings as well as his, it was the last straw. She began to cry, and came to find out her mother was sick and she was worried most to death—afraid to ask leave to go home at that time of year for fear she'd lose her job, and feeling dreadfully. She was so stirred up she just burst out the whole story to us children. I suppose she hardly knew what she was doing, and it was a relief to say what was in her mind."

"Well, you better believe that boy was ashamed of himself. He apologized right before us all. And he patting that poor woman on the shoulder, for all the world the way, years after, I've seen him pat his patients when he was sorry for 'em. Mercy! how clear it all comes back! Kate Knowles (she was George E's aunt and the girl that Edward Howe was engaged to later), was crying in sympathy; and so was Lizzie Baker, though she wasn't but six years old. But Deacon Howe on the school board then, and when Edward went home and told the story, his father gave the teacher a month's leave, and she went off that very afternoon."

"Did her mother die?" asked Charlman, who invariably became absorbed in Grandma's reminiscences.

"No, child, she got better and came to live in Wickfield. They were real nice folks, and stayed here till the daughter got a school in Portland. Dear me! here I wanted to hear about the festival, and instead I've been talking every minute, boring you to death most likely, too. Are you going to finish fixing the doctor's office this morning, Charlman?"

"I'm going to fix it myself," declared the doctor, "if your granddaughter will tell me what to do. I'm thrilled at that office, Mrs. Davis. It's a dream come true."

"Maybe you'd better call me Grandma to start with," said the old lady. "I don't know when any one's said

"I don't know when any one's said

"I don't know when any one's said

"I don't know when any one's said

A Public Danger

Caught Disease On the HANDS!

Skin disease threatens us every day. Inevitable germs of blood-poison, eczema, etc., are waiting to infect the least cut or sore place. The money you use carries germs—so get them on the handles, rails and straps of the trains and street cars, and in a score of other ways. Soiled through Zamb-hol, Mr. Henry C. Davis, of South 17th Street, Kansas City, U.S.A., has had his hands soiled with public toilets.

"I had medical advice," he says, "tried in addition all sorts of so-called eczema remedies, without finding the hoped-for relief. Zamb-hol treatment gave me positive results. It took away the painful irritation and quickly purified and healed the deep troublesome sores."

Mrs. to me, and it don't sound natural. Everybody calls me Grandma, even Edward Howe who was only two years back of me in school. Folks in Wickfield might not know who you mean if you said Mrs. Davis."

"It's very good of you to let me—Grandma," answered the young man, smiling. "It makes me feel like one of the family."

"That's how I want you to feel, sonny," she responded; while Charlman laughed and said:

"Is that the way to address a dignified physician? I'm surprised at you, Grandma! Soon as I get these dishes out of the way, Doctor, I'll join you in the office; and in the meantime you can carry the biggest books up attic. By afternoon you'll be ready for your first patient. Aren't you thrilled at the thought?"

"I shall be more thrilled when he arrives!" answered John Carter. "Here's hoping I don't starve while waiting for him."

Grandma shook her head.

"I never was one to be a wet-blanket; but you may as well swallow the fact right off that Wickfield folks are so in their ways, and they're used to Edward Howe. Isn't that some one in the shop? I heard the door open. You lend me a hand, sonny, and I'll see to 'em so Charlman can get right to work."

A half hour later when Charlman looked in at the new office, John Carter was unpacking a box of his own books and placing them on the shelves.

"Let me hand them to you," she suggested. "You know where you want to put them, and I don't." She glanced at the back of a big volume, and said, so solemnly that the doctor laughed: "Gray's Anatomy. What a horrible title! Do you know, I can't help feeling sorry for these shelves, supporting such dry subjects for years and years."

"I'll present you with some detective stories, or something jazzy in the way of novels. A risqué volume might be a relief to these poor shelves after being so deadly respectable for fifty years. First the ponderous law weighing them down, and now—"

She sighed despairingly as she wiped the dust from "Osler's Practice," and held it out.

"Bring on your legs," invited John Carter as he reached for the despised volume.

"I dare say I need it, after a pretty steady diet of the other things. But I believe you'll find one or two less hopeless subjects in that last box. Let's empty it here on the desk, and then I'll carry off the packing cases and we can clear up."

When he returned she was smiling over "Pepp's Diary," and remarked wickily: "I think I'll take this in to Grandma. I'd like to see how she'd react to it, wouldn't you?"

"Haaa! she read it?"

"I don't believe so, and her comments might be valuable! I'm glad to see that you're a devotee of 'Sherlock Holmes,'—and Dickens. I think there's hope for you despite the dignity that Grandma mentioned."

He actually flushed.

"Say, do I put on airs—behave like an idiot or anything?"

Charlman laughed.

"I seem to have got a 'rise' out of you," she said. "Don't worry. I haven't detected any airs, nor the first sign of idiocy. In Grandma's day a doctor never appeared in public without a full beard and a frock coat. She was shocked to death when Doctor Howe began to dress like a civilized being and shaved off his whiskers; but in her eyes he can do no wrong. Because he brought you here, you appear the ideal M.D. to her, dignity and all. That's why she was appalled at the brasseness of—of the green hat!"

"The doctor laughed as he replied: "Poor old hat! It seems to have stirred up a tempest in a teapot!"

"It is a new hat," corrected Charlman, "and a tempest isn't a patch on what it has stirred up."

He raised his eyes wickily.

"What do you mean? You sound subtle; and I warn you that subtlety is a quality I can't abide." (To Be Continued.)

London Bus Driver Emigrates

Solves Traffic Jams Problems By Breaking Anew To Wide Open Spaces Of Western Canada

It took twenty-one years for A. W. J. Powell, bus-driver, to weary of the whirl and roar of London traffic and break away to the great open spaces. But at least the bus yielded to the plow, and this spring will find Powell on the land somewhere in the prairies.

His sons had a great deal to do with it. Alfred Arthur Edward, who is twenty, came to Canada in 1926, and liked the country so well that he persuaded a younger brother, William Henry Charles, to join him the following year. Places were found in Ontario for the two boys by the Canadian National Railways. Their experiences convinced the father that it was time to forsake the bus, and arrangements were therefore made by the European Colonization Organization of the Canadian National Railways for the family to sail for Canada in March. The Winnipeg office will help them decide where to make their future home.

Before leaving London, Powell confessed that he had always had a hankering for a farm.

"I like bus driving first rate, but the traffic jams in London are a bit of a nuisance. The best way to solve the traffic problem is to move out of it, and I'm told there aren't many traffic jams out on the Canadian prairies. I always had in my mind's eye the ownership of my own in one of the Dominions."

Powell was one of the many London bus-drivers who drove London buses in France during the war, and he was one of the forty who went to Buckingham Palace in 1919, to be received by the King.

Line To Churchill

Not Complete Yet

Report Of Immediate Train Service To Churchill Is Denied By C.N.R.

The report which has gained newspaper circulation that the Canadian National Railways will inaugurate regular passenger and freight service between The Pas and Churchill in April is incorrect according to A. A. Tidale, general manager, western region, Canadian National Railways. The report which emanated from The Pas apparently found its beginning in Churchill this summer. The nine miles of the line to Churchill has received only the first lift of ballast and it will have to be given a second lift before it can be turned over by the construction to the operating department for regular service. Ballasting work can only be done when the weather moderates and it is not expected that the line will be ready for the operation of passenger trains until the end of the summer and no scheduled passenger or freight service is under contemplation by the company at the present time beyond Mile 326.

With so much preparation at hand as Miller's Worm Powders, the mother who allows her children to suffer from worms is careless. It is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a mercurial act to rid it of these destructive parasites, especially when it can be done without difficulty.

Finishes Big Task

Worker-Poet Of 76 Futa Whole Bible Into Verse

The entire Bible has been rewritten into poetry, making 6,000 closely written pages, six sacks full of manuscript, by William Houston, 76 years old, a working man at Cincinnati.

Houston's Bible is a rhymed version of the historic Bishop Bible which dates back to 1571. He has studied all the old Bibles in the Public Library there and knows thousands of lines by heart.

His verse is the old-fashioned "rhyme royal," with stanzas of seven lines, and in the quaint English of hundreds of years ago, which he mastered by studies of Chaucer and Spenser.

World's Fair For Vancouver The organization of a World's Fair at Vancouver in 1926, to celebrate the city's golden jubilee, will be undertaken by the Vancouver Exhibition, approved by the city council, it is announced by J. G. Matheson, general manager.

Minnard's Has Wonderful Antiseptic Power.

For any BABY

We can never be sure just what makes an infant restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as Baby has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and the chae it promptly. Relief will follow

very promptly; if it doesn't, you should call a physician. All through babyhood, Castoria should be a mother's standby; and a wise mother does not change to stronger medicines as the child grows older. Castoria is readily obtained at any druggist, and the genuine easily identified by the Chas. H. Fletcher signature that appears on every wrapper.

Produces Artificial Fever

Scientist Tells Of Possibilities Of New Discovery

Discovery of a new short length wave, that may easily be developed into a death ray, but also may have great curative properties, was announced, at Philadelphia, by E. L. Manning, of the General Electric Company's research laboratories.

Speaking before the Engineers' Club of Philadelphia, Mr. Manning said:

"We have learned to build vacuum tubes which will broadcast such a short length wave that people in the neighborhood will have their blood temperatures raised. This means that we can produce artificial fever and hold it under control, within any limits we choose."

Manning stated that if natural fever was "an attempt on the part of the body to kill off bacteria that attack it, as is believed, this new discovery may prove of startling value in the treatment of disease."

The ray, Manning said, could easily be used to induce such a high fever in human beings that it would result in death.

"We are experimenting with rabbits and rats," said Mr. Manning, "and the results are most encouraging. Diseases corresponding to those of humans appear to have been eliminated by these artificial fevers," he said.

Alberta Coal Production

Coal Mines Of Province Produced 7,147,250 Tons In Year 1929

Alberta coal mines produced 7,147,250 tons of coal, valued at \$22,491,061 during the year 1929, according to the annual report of A. A. Miller, chief inspector of mines for the province. In addition to the coal mined there were 71,197 tons of shale mined from which 26,077,733 bricks were manufactured.

Combine-Harvested Wheat Combined-harvested wheat in Canada compares very favourably with binder-harvested wheat from a milling and baking standpoint. In general no difference could be observed between the two in regard to these qualities, although in one season at least the combine-harvested wheat was slightly superior to the binder-harvested wheat.

Minard's For Filling Hail: Water-Fowl Suffer From Drought Owing to drought conditions in Canada's Prairie Provinces during 1929 many lakes, prairie sloughs, and shallow lakes used for breeding purposes by water-fowl were dried up.

Thirty American airplanes are in service in Peru.

International Dairy Congress Canada will be identified, officially, with the International Dairy Congress at Copenhagen, Denmark, in 1931, through the appointment by the Department of Agriculture of Dr. J. A. Rudlick, dairy and cold storage commissioner, as Canadian representative.

Excess acid is the common cause of indigestion. It results in pain and causes about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and its action is quick. You will never rely on crude methods, never continue to suffer, never ignore your health, never miss pleasantly this premier medicine. Please let it show you now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Little Helps For This Week

"Cast thy burden upon the Lord, and He shall sustain thee."—Psalm lv. 22.

Child of my love, lean hard, And let me feel the pressure of thy care.

I know thy burden, child; I shaped it. Ploied it in mine own hand, and made no proportion.

In its weight to thine unaided strength; For even as I laid it on I said, I shall be near, and while she leans

This burden shall be mine, not hers. So shall I keep My child within the circling arms Of mine own love. Here lay it down, nor fear

To impose it upon a shoulder which upholds The government of worlds. Yet closer come. Thou art near enough; I would embrace thee.

So I might feel my child replying on my breast. Then lovest Me? I know it. Doubt not then.

But loving Me lean hard. He that takes his own cares upon himself loads himself in vain with an uneasy burden.—Bishop Hall.

HEALTHY CHILDREN ALWAYS SLEEP WELL

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing and spreads sunshine to the whole household. It is only the sickly child that is cross and peevish. Mothers if your children do not sleep well; if they are cross and cry a great deal do not scold them. That is their way of telling you they are ill. When baby is like this give him Baby's Own Tablets and he will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation and indigestion, break up colds and simple fevers and promote healthy sleep. They are absolutely guaranteed free from opiates and other harmful drugs and may be given to the new-born babe with perfect safety and good results.

Baby's Own Tablets are sold by all dealers in medicine or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

International Dairy Congress Canada will be identified, officially, with the International Dairy Congress at Copenhagen, Denmark, in 1931, through the appointment by the Department of Agriculture of Dr. J. A. Rudlick, dairy and cold storage commissioner, as Canadian representative.

\$1700 in Tax Arrears
At the council meeting on Mon-
day we learned that the Village has
\$1700.00 outstanding in uncol-
lected taxes. Hot dog! It's a
hard year all right, but taxes and
death are two things we can not
escape; and how the penalties
pile up on overdue taxes is a cau-
tion.
You can not possibly make bet-
ter interest on your money than
by paying your taxes, even though
you have to borrow money to do it.

A representative of the Fire
Fighters Co., appeared before the
Village Council on Monday night
and endeavored to sell the Village
more up to date fire fighting equip-
ment. Unfortunately the Village
is not in a financial position at
present to buy any further equip-
ment, and if they were it would be
just too bad if they did, because as
we all know, that a good fire here
would wipe out some of these ram-
shackles on the main drag.

Why Not Tell the People
The Alberta legislature make
many laws and introduce amend-
ments to other laws, that make it
rather difficult for the average man
to keep in touch with the multitude
of restrictions placed upon the
statute books. Not long ago auto
drivers' licenses were added to the
list, and there are probably many
people who are not aware of such a
law. Threshers' licenses must be
secured, shooting licenses must be
paid for, and the farmer cannot
even sell eggs direct to the consumer
without infringing an Alberta
law. The liquor act is not thor-
oughly known to the majority of the
people. It looks as if we are tre-
mendously burdened with laws and
restrictions that make it difficult to
live a law abiding life. However,
with these laws included in our
statute books, why not the Govern-
ment appraise the people of their
laws by publishing a synopsis of
same in the newspapers.

The other night while out driv-
ing with a friend in his car, (We do
not know of a weekly editor in Al-
berta who owns a car and has it
paid for) we drove by the last
place on earth—the cemetery, and
we want to congratulate the ladies
of the Crossfield Women's Insti-
tute in their untiring efforts in
the work they have accomplished
in beautifying the cemetery.

We do not hesitate in stating
that there is not a town in Alberta
than can boast of a cemetery
that's as well kept as our own
burial ground here in Crossfield.
More power to the W. I.

You are cordially invited.

Local and General
Joe Trca was a business visitor
in Calgary on Tuesday.
Mrs. Pogue and son Stanley spent
Saturday in Calgary.
Mr. Copenhagen of Calgary was
a visitor in town over the week-end.
Miss Pearl Stauffer was a visitor
in Calgary on Saturday.
Clayton High motored to Calgary
on Sunday.
Mrs. J. M. Williams entertained
at the tea hour on Friday last.
Mr. and Mrs. R. M. McCool
arrived home last week-end from
Edmonton.

Hughie McIntyre was a business
visitor to Calgary on Wednesday.
Jack Blegau and Charlie Miel-
and motored to Calgary on Tues-
day.

Mr. F. J. Monkman of Carstairs
is visiting his daughter Mrs. J. R.
Gilchrist.

Mrs. Percy Griffiths and children
were visitors to Calgary over the
week-end.

Syd Hetheridge of Calgary spent
Saturday in town visiting Mr. and
Mrs. Walter Major.

Mr. B. Monkman and children
of Calgary spent Sunday at the
home of Mr. and Mrs. Gilchrist.

Mr. and Mrs. Hewitt contem-
plate moving this month, having
rented the Nerland house in the
south part of town.

Mrs. J. Robertson arrived home
on Tuesday from Edmonton, hav-
ing been visiting her daughter
Anna at that city.

You are cordially invited to at-
tend the meeting for Bible study
and prayer on Sunday morning
at 11 o'clock in the United Church.

Mrs. John Massie, who has been
visiting in Calgary and Midnapore
for the past two weeks returned
home on Saturday.

Mrs. W. Major is rushing the
season as regards gardening. We
learn she was busy planting seeds
in her garden last week-end.

Jack Morrell, master painter
and decorator of Calgary, is now
in town and anyone wanting work
done in his line can find him at
the Oliver Hotel.

Remember, the Women's Guild
will hold a tea and Apron sale in
the U. F. A. hall on Easter Satur-
day, April 19th.

Mrs. Archie McFadyen, arrived
home last week from Pasadena,
California, where has been visit-
ing her mother for the past three
months.

Have you paid your subscrip-
tion to the Chronicle? You know
its pretty hard trying to run this
paper of Christian Science.

Earl Devins made a flying trip
to Okotoks, motoring down on
Saturday night and back on Sun-
day night.

The tea and sale of home cook-
ing held in Laut's store, under the
auspices of the United Church
Ladies Aid on Saturday, was well
patronized and a success.

A dance will be given in the U.
F. A. hall on Monday, May 9th,
under the auspices of the Crossfield
Tennis Club. Snappy music by the
Olson-Borbridge Orchestra.

Miss Gladys Gilchrist celebrated
her birthday on Monday last. The
lawn in front of the Waldox resi-
dence resounded with happy voices
of the children who were gathered
together as Miss Gilchrist's guests.

H. R. Fitzpatrick is out of town
this week, taking stock at several
of the Atlas Lumber Co. yards,
north of Crossfield. Earl Devins
has charge of the local yard during
his absence.

Don't forget the Rebekah Lodge
will hold a tea and sale of home
cooking on Saturday, April 12th,
from 3 to 6 o'clock in the Odd-
fellows hall. All welcome.

A fine spirit of co-operation was
shown this week between our local
implement men, when Walter
Spivey was seen leaving for the
country hauling a John Deere
plow behind a McCormick Deering
tractor.

Additional local news will be
found on inside supplementary
page.

Agricultural Society Would Like to Hold School Fair

The meeting of the directors of
the Agricultural Society, held in
the fire hall on Saturday afternoon
was poorly attended, but those
present seemed very enthusiastic
about holding a fall fair for the
children.

President Russell and Secretary
were appointed as a committee,
with power to add to their num-
ber, to ascertain the cost of holding
such a fair.

It was thought that a fall fair,
giving prizes for live stock, veg-
etables, flowers, grains, etc., along
with base ball and athletic events,
would be worth while.

All those interested in this pro-
ject are asked to get in touch with
the president or secretary.

R. M. McCool, M.L.A. to Speak at Institute Meeting on April 17

Crossfield Women's Institute meet-
ing on Thursday, April 17th at the
home of Mrs. Purvis.

Roll call. Sing, say or pay \$c.

Tennis Club Elect Officers

At a meeting of the Crossfield
Tennis Club held on April 1st, the
following officers were elected:

Hon. Pres, I. Lewis
President, F. Mossop
Vice-President, H. Ballam
Sec.-Treas, Mrs. H. Ballam.
Executive Committee:—Above
officers and H. A. Miller and A.
Stevens.

Grounds Committee:—H. Bal-
lam, N. McIntosh, R. H. Hay,
B. A. Bannister, J. C. Dougan,
W. Murdoch, A. Stevens.
Ladies Committee:—Mrs. H.
Ballam, Mrs. A. Stevens, Mrs.
M. Thomas.

A dance will be held in the U.
F. A. Hall on Friday, May 9th.

OBITUARY

Apparently the victim of carbon-
monoxide gas poisoning, Matthew
George Murton, Alberta pioneer,
was found lying dead on the floor
of his garage at 2007, Twenty-fifth
street west at 9:30 o'clock on Thurs-
day night. Death is believed to
have taken place on Thursday morn-
ing when Mr. Murton went to the
garage to start his car.

At 9:30 o'clock, Friday night,
Mrs. Murton happened to enter the
garage and found the body of her
husband lying on the floor. Mr.
Murton had jacked the rear end of
the car up to facilitate cranking and
it is believed that with the engine
going he had knelt down to
extract the jack when the blast of
poisonous fumes from the exhaust
proved fatal.

The funeral was held on Satur-
day from the Armstrong funeral
home and was largely attended.
The floral tributes were many and
beautiful. The Oddfelloes service
was solemn and impressive. In-
terment was made in the Burnslund
cemetery, Calgary.

The victim was a native of Port
Elgin, coming west in 1891, settling
west of Crossfield, and after selling
his farm, now owned by Mr.
Giles—moved to Crossfield, where
he lived for three years before go-
ing to Calgary. For eight years
following he was meat inspector for
P. Burns & Company. Subse-
quently Mr. Murton entered busi-
ness for himself as a poultry raiser
and produce merchant.

Mrs. Fred Ingham of Sampson-
ton is a sister of the deceased.

Mrs. Laut and Mrs. Whillans
were combined hostesses to the
Airdrie and Crossfield bridge clubs
at the home of Mrs. Laut on
Thursday night.

The visiting ladies present were:
Mrs. (Dr.) Edwards, Mrs. E. Ed-
wards, Mrs. Heggie, Mrs. Sinclair
of Airdrie.

Mrs. I. Lewis winning first prize
and Mrs. S. Willis the consolation.

Tennis Dance in the U. F. A. Hall on
Monday, May 9th. Snappy music.

I have something of interest to offer you.
THERE IS A
